Future of the Office Peter Cappelli, 2021-08-10 A GLOBE MAIL BEST BUSINESS BOOK OF 2021 The COVID 19 pandemic forced an unprecedented experiment that reshaped white collar work and turned remote work into a kind of new normal Now comes the hard part Many employees want to continue that normal and keep working remotely and most at least want the ability to work occasionally from home But for employers the benefits of employees working from home or hybrid approaches are not so obvious What should both groups do In a prescient new book *The Future of the Office Work from Home Remote Work and the Hard Choices We All Face* Wharton professor Peter Cappelli lays out the facts in an effort to provide both employees and employers with a vision of their futures Cappelli unveils the surprising tradeoffs both may have to accept to get what they want Cappelli illustrates the challenges we face by in drawing lessons from the pandemic and deciding what to do moving forward Do we allow some workers to be permanently remote Do we let others choose when to work from home Do we get rid of their offices What else has to change depending on the approach we choose His research reveals there is no consensus among business leaders Even the most high profile and forward thinking companies are taking divergent approaches Facebook Twitter and other tech companies say many employees can work remotely on a permanent basis Goldman Sachs JP Morgan and others say it is important for everyone to come back to the office Ford is redoing its office space so that most employees can work from home at least part of the time and GM is planning to let local managers work out arrangements on an ad hoc basis As Cappelli examines earlier research on other types of remote work including telecommuting offers some guidance as to what to expect when some people will be in the office and others work at home and also what happened when employers tried to take back offices Neither worked as expected In a call to action for both employers and employees Cappelli explores how we should think about the choices going forward as well as who wins and who loses As he implores we have to choose soon *Decisions and Orders of the National Labor Relations Board* United States. National Labor Relations Board, 1991 **The Future of Human Capital** Thomas A. Kochan, Adam Seth Litwin, 2011 Key features of the employment relationship need to be better incorporated into human capital theory and policy Moreover significant changes in the assumptions and practices embedded in employment systems will be required if human capital is to serve as an economy's predominant source of competitive advantage This chapter considers the assumptions that guided researchers and policymakers among others in the industrial era and the institutions constructed to address three particular labor market human resource related issues human capital formation and development work life integration and the role of women in the labor market and the relationships between technology technological change and employment practices It uses the US employment relations system as a case in point to illustrate how practices and assumptions that once enabled the employment relationship to manage these three challenges must change in fundamental ways if the American economy is to gain competitive advantage from human capital in the future **Contemporary Work and the Future of Employment in Developed Countries** Taylor & Francis Group, 2021-09-30 Whilst only in the second decade of the 21st century we have

seen significant and fundamental change in the way we work where we work how we work and the conditions of work The continued advancements of smart technology and artificial intelligence globalisation and deregulation can provide a sleek view of the world of work This paradigm can deliver the opportunity to both control work and provide new challenges in this emerging virtual and global workplace with 24 7 connectivity as the boundaries of the traditional organisation melt away Throughout the developed world the notions of work and employment are becoming increasingly separated and for some this will provide new opportunities in entrepreneurial and self managed work However the alternate or bleak perspectives is a world of work where globalisation and technology work together to eliminate or minimise employment underpinning standardised employment with less and less stable or secure work typified by the rise of the gig economy and creating more extreme work in terms of working hours conditions and rewards These aspects of work are likely to have a significant negative impact on the workforce in these environments These transformations are creating renewed interest in how work and the workforce is organised and managed and its relationship to employment in a period when all predictions are that the pace of change will only accelerate

U.S. Labor Law and the Future of Labor-management Cooperation, 1987 [Shaping the Future of Work](#) Thomas A. Kochan, 2015-12-01 Shaping the Future of Work lays out a comprehensive strategy for changing the course the American economy and employment system have been on for the past 30 years The goal is to create more productive businesses that also provide good jobs and careers and by doing so build a more inclusive economy and broadly shared prosperity This will require workers to acquire new sources of bargaining power and for business labor government and educators to work together to meet the challenges and opportunities facing the next generation workforce The book reviews what worked well for average workers families and the economy during the era of the post World War II Social Contract why that contract broke down and how working together we can build a new social contract suitable to today s economy and workforce The ideas presented here come from direct engagement with next generation workers who participated in a MIT online course devoted to the future of work and from the author s 40 years of research and active involvement with business government and labor leaders over how to foster innovations in workplace practices and policies
