Bridges, Mark D. Groves, David P. Nicholls, 2016-02-04 In the summer of 2014 leading experts in the theory of water waves gathered at the Newton Institute for Mathematical Sciences in Cambridge for four weeks of research interaction A cross section of those experts was invited to give introductory level talks on active topics This book is a compilation of those talks and illustrates the diversity intensity and progress of current research in this area The key themes that emerge are numerical methods for analysis stability and simulation of water waves transform methods rigorous analysis of model equations three dimensionality of water waves variational principles shallow water hydrodynamics the role of deterministic and random bottom topography and modulation equations This book is an ideal introduction for PhD students and researchers looking for a research project It may also be used as a supplementary text for advanced courses in mathematics or fluid dynamics      **Sheaves and Functions Modulo p** Lenny Taelman, 2016 Describes how to use coherent sheaves and cohomology to prove combinatorial and number theoretical identities over finite fields      Representation Theory and Harmonic Analysis of Wreath Products of Finite Groups Tullio Ceccherini-Silberstein, Fabio Scarabotti, Filippo Tolli, 2014-01-16 This book presents an introduction to the representation theory of wreath products of finite groups and harmonic analysis on the corresponding homogeneous spaces The reader will find a detailed description of the theory of induced representations and Clifford theory focusing on a general formulation of the little group method This provides essential tools for the determination of all irreducible representations of wreath products of finite groups The exposition also includes a detailed harmonic analysis of the finite lamplighter groups the hyperoctahedral groups and the wreath product of two symmetric groups This relies on the generalised Johnson scheme a new construction of finite Gelfand pairs The exposition is completely self contained and accessible to anyone with a basic knowledge of representation theory Plenty of worked examples and several exercises are provided making this volume an ideal textbook for graduate students It also represents a useful reference for more experienced researchers      *Recent Progress in the Theory of the Euler and Navier-Stokes Equations* James C. Robinson, José L. Rodrigo, Witold Sadowski, Alejandro Vidal-López, 2016-01-21 The rigorous mathematical theory of the Navier Stokes and Euler equations has been a focus of intense activity in recent years This volume the product of a workshop in Venice in 2013 consolidates surveys and further advances the study of these canonical equations It consists of a number of reviews and a selection of more traditional research articles on topics that include classical solutions to the 2D Euler equation modal dependency for the 3D Navier Stokes equation zero viscosity Boussinesq equations global regularity and finite time singularities well posedness for the diffusive Burgers equations and probabilistic

aspects of the Navier Stokes equation The result is an accessible summary of a wide range of active research topics written by leaders in their field together with some exciting new results The book serves both as a helpful overview for graduate students new to the area and as a useful resource for more established researchers     Recent Advances in Hodge Theory Matt Kerr, Gregory Pearlstein, 2016-02-04 Combines cutting edge research and expository articles in Hodge theory An essential reference for graduate students and researchers     *Complexity Science* Robin Ball, Vassili Kolokoltsov, Robert S. MacKay, 2013-11-21 This book presents introductions to the essential mathematical aspects of complexity science suitable for advanced undergraduate masters level students and researchers     *Geometry* McGraw-Hill Staff, 2000-08-01     Annual Catalogue Vassar College, 1935     **Geometry** McGraw-Hill Staff, 2000-09-01     **Geometry** McGraw-Hill Staff, 2000-10-01     *Geometry* McGraw-Hill Staff, 2001-03-01     **Geometry** McGraw-Hill Staff, 2001-04-01     *Geometry* McGraw-Hill Staff, 2001-01-01     **Geometry** Price, 2000-09-01     **Artificial Intelligence Abstracts** , 1991     *Contributions to and a Survey on Moduli Spaces of Differential Geometric Structures with Applications in Physics* Osmo Pekonen, 1988
