Future Of Nuclear Deterrence:

The Future of Nuclear Deterrence George H. Quester, 1986 *START and the Future of Deterrence* Michael J. Mazarr, 1990-06-18 Examining the future of nuclear deterrence in the 1990s and beyond this book outlines aspects of the evolving strategic environment It also projects the likely future of deterrence strategies and strategic force postures Other topics such as the Soviet nuclear doctrine are also covered *Deep Cuts and the Future of Nuclear Deterrence* Aspen Strategy Group (U.S.), 1989 This volume opens with an analysis of public opinion data which reveals that several common beliefs about public attitudes toward defense are myths The public has not repudiated nuclear deterrence public attitudes are quite stable not volatile and public opinion is not contradictory Despite the politicization of nuclear weapons policy this report explains three key elements can be combined to form a national security strategy which could be supported by a consensus of experts and publics among the Western alliance First in terms of nuclear weapons the focus of arms control negotiation should be redirected to enhancing stability at substantially lower numbers In terms of conventional weapons several initiatives should be undertaken Also civilian political leaders should begin a major NATO based study on warning and decision making Furthermore a consensus defense and arms control strategy should include restrictions on anti satellite weapons and SDI This volume is divided into five parts Introduction Stability and Change in Public Opinions about Nuclear Weapons Policy 1945 1987 Four Alternative National Security Futures Lessons Learned from Examining Radical Changes and Building Towards a Consensus Co published with the Aspen Strategy Group **The Future of Extended Deterrence** Stéfanie von Hlatky, Andreas Wenger, 2015-09-01 Are NATO s mutual security commitments strong enough today to deter all adversaries Is the nuclear umbrella as credible as it was during the Cold War Backed by the full range of US and allied military capabilities NATO s mutual defense treaty has been enormously successful but today s commitments are strained by military budget cuts and antinuclear sentiment The United States has also shifted its focus away from European security during the wars in Afghanistan and Iraq and more recently with the Asia rebalance Will a resurgent Russia change this The Future of Extended Deterrence brings together experts and scholars from the policy and academic worlds to provide a theoretically rich and detailed analysis of post Cold War nuclear weapons policy nuclear deterrence alliance commitments nonproliferation and missile defense in NATO but with implications far beyond The contributors analyze not only American policy and ideas but also the ways NATO members interpret their own continued political and strategic role in the alliance In depth and multifaceted The Future of Extended Deterrence is an essential resource for policy practitioners and scholars of nuclear deterrence arms control missile defense and the NATO alliance **The Future of Nuclear Deterrence** Carl H. Builder, 1991 **The Future Of Deterrence** Robbin F Laird, Betsy Jacobs, 2019-07-11 The editors would like to express their thanks to a number of colleagues whose insights and comments contributed to the development of the book Among those who were particularly helpful were Robert Nurick Vic Utgoff Mike Clarke Jorg Baldouf Jean Chabaud John Roper Edwina

Moreton Lawrence Freedman Francois Heisbourg and Harley Balzer We are particularly grateful to General William Y Smith President of the Institute for Defense Analyses for his intellectual encouragement *Future of Strategic Deterrence* Christoph Bertram,1981-06-18 Deep Cuts and the Future of Nuclear Deterrence Aspen Strategy Group (U.S.),1989 This volume opens with an analysis of public opinion data which reveals that several common beliefs about public attitudes toward defense are myths The public has not repudiated nuclear deterrence public attitudes are quite stable not volatile and public opinion is not contradictory Despite the politicization of nuclear weapons policy this report explains three key elements can be combined to form a national security strategy which could be supported by a consensus of experts and publics among the Western alliance First in terms of nuclear weapons the focus of arms control negotiation should be redirected to enhancing stability at substantially lower numbers In terms of conventional weapons several initiatives should be undertaken Also civilian political leaders should begin a major NATO based study on warning and decision making Furthermore a consensus defense and arms control strategy should include restrictions on anti satellite weapons and SDI This volume is divided into five parts Introduction Stability and Change in Public Opinions about Nuclear Weapons Policy 1945 1987 Four Alternative National Security Futures Lessons Learned from Examining Radical Changes and Building Towards a Consensus Co published with the Aspen Strategy Group Nuclear Deterrence And Global Security In Transition David Goldfisher,2019-04-08 This book contains papers presented at a conference held at the University of California s Institute on Global Conflict and Cooperation in 1991 The papers reflect the spectrum of thought in the expert community that is likely to frame the policy debate over the future of nuclear deterrence **The Past and Future of Nuclear Deterrence** Stephen J. Cimbala,1998-07-23 As proven by the recent discovery of ongoing research and tests in India and Pakistan the nuclear age is not dead Nuclear weapons deployed in plentiful numbers during the Cold War by the Americans and Soviets and in lesser numbers by others were nevertheless controlled in their use by the essential equivalence of U S and Soviet strategic power and by the ability of the U S and the Soviet Union to dominate the international security environment by means of their global military power Now the setting within which nuclear weapons exist has been transformed Now that the Cold War has ended and the Soviet Union has vanished states seeking nuclear weapons operate under decision making rules that are sometimes opaque to Western observers If the end of the Cold War leads to the unrestrained spread of nuclear weapons Cimbala stresses that a combination of military hubris and arms control insolvency could lead to new nuclear crises or worse The author provides a provocative analysis for policy makers and professional military staff as well as scholars and researchers involved with international relations security studies and arms control Nuclear Weapons and the Future of Humanity Avner Cohen,Steven Lee,Steven P. Lee,1986 The excellent quality and depth of the various essays make the book an invaluable resource It is likely to become essential reading in its field CHOICE The Future of U.S. Nuclear Weapons Policy Committee on International Security and Arms Control,National Academy of Sciences,1997-07-01 The debate about

appropriate purposes and policies for U S nuclear weapons has been under way since the beginning of the nuclear age With the end of the Cold War the debate has entered a new phase propelled by the post Cold War transformations of the international political landscape This volume based on an exhaustive reexamination of issues addressed in *The Future of the U S Soviet Nuclear Relationship* NRC 1991 describes the state to which U S and Russian nuclear forces and policies have evolved since the Cold War ended The book evaluates a regime of progressive constraints for future U S nuclear weapons policy that includes further reductions in nuclear forces changes in nuclear operations to preserve deterrence but enhance operational safety and measures to help prevent proliferation of nuclear weapons In addition it examines the conditions and means by which comprehensive nuclear disarmament could become feasible and desirable *Nuclear Threats, Nuclear Deterrence, and the Future of Nuclear Restraint Regimes After Russia's War of Aggression* Matthias Dembinski, Mikhail Polianskii, 2024 Russia s war of aggression exacerbates nuclear threats in multifaceted and potentially catastrophic ways while diminishing the prospects for arms control and nuclear restraint regimes In this it is comparable to the early phases of the Cold War This PRIF report critically examines the transformative impact Russia s war is having on the contemporary nuclear order focusing on the utility of nuclear weapons in crisis bargaining the credibility and sources of extended deterrence and the functions and limitations of arms control Drawing on lessons from the past the authors discuss what a future nuclear strategy might look like [The Future of Nuclear Deterrence](#) United States. Congress. Senate. Committee on Governmental Affairs. Subcommittee on International Security, Proliferation, and Federal Services, 1997 *Future of United States Nuclear Deterrence and the Impact of the Global Zero Movement* Seth C. Frank, Air University (U.S.). Air War College, 2013 Advocates have recently proffered the Global Zero Commission GZC proposal as an alternative US nuclear strategy The potential impact of the GZC proposal warrants a thorough examination of its background theoretical roots assumptions and impacts to include a comparison to US strategy This paper s analysis finds the overall GZC framework to be insufficient and potentially harmful to US national security The GZ recommends an aggressive advance toward nuclear weapons elimination and proposes short term reductions well beyond current US plans The proposal presumes significant international cooperation The most appealing GZC recommendation is for a de facto minimum deterrence model en route to GZ To its detriment however the GZC proposal relies on the implausibility of future nuclear conflict with Russia or China and that a reduced US arsenal will remain a capable credible deterrent Ironically the GZC touts superior conventional forces and Ballistic Missile Defense BMD systems as a replacement for a US nuclear deterrent even as these capabilities appear to fuel further nuclear arms races A final GZC proposal shortcoming is the lack of any definitive recommendations specifically addressing continued nuclear proliferation by rogue states Abstract *The Future of Nuclear Weapons* Patrick J. Garrity, 1988 *Minimum Deterrence: Examining the Evidence* Keith B. Payne, James Schlesinger, 2016-04-14 The National Institute for Public Policy s new book *Minimum Deterrence Examining the Evidence* is the first of its kind Dr Keith Payne

former Secretary of Defense James Schlesinger and an unparalleled bipartisan group of senior civilian and military experts critically examine eight basic assumptions of Minimum Deterrence against available evidence In general Minimum Deterrence does not fare well under the careful scrutiny Proponents of a Minimum Deterrent US nuclear force posture believe that anywhere from a handful to a few hundred nuclear weapons are adequate to deter reliably and predictably any enemy from attacking the United States now and in the future Because nuclear weapons are so destructive their thinking goes no foreign leader would dare challenge US capabilities The benefits advocates claim of reducing US nuclear weapons to the minimum level needed are better relations with Russia and China reinforcement of the arms control and Nonproliferation Treaty billions of defense dollars in savings and greater international stability on the way to nuclear zero As political pressure builds to pursue this vision of minimum US deterrence Minimum Deterrence Examining the Evidence stands as the seminal study to address the many claims of great benefit using available evidence This book was published as a special issue of Comparative Strategy Perseverance of Power David P. Goode, Air University (U.S.). School of Advanced Air and Space Studies, 2013 This study will examine the role of nuclear deterrence through historical case studies applying lessons learned to anticipate the role nuclear deterrence might play in the most likely scenarios of the future The role of nuclear deterrence has rarely been static suited for all contexts Instead nuclear deterrence has evolved from its earliest use in the post World War II multipolar environment to the bipolar international order of the Cold War through today's setting following the collapse of the Soviet Union Further this study demonstrates that while the characteristics of nuclear deterrence have evolved to meet the different contexts of nuclear rivalries its nature is enduring Abstract The Future of Strategic Nuclear Deterrence Thomas J. O'Connell, 2014 This thesis examines strategic nuclear force structure options for a future 1 000 warhead force It argues that based on the combined effects of a reduced nuclear force budgetary pressures and a goal of reducing the role of nuclear weapons in defense planning a departure from the triad force structure is likely The thesis compares a triad appropriately reduced from the levels required by New START limitations against a monad of SSBNs and dyads of ICBM I Bomber ICBM I SSBN and SSBN I Bomber and concludes a dyad of ICBMs and SSBNs represents the best mix for strategic deterrence The thesis also postulates that while a departure from the triad is groundbreaking it is a well grounded approach based on deterrence theory and its evolutionary application over time in both policy and the capability and capacity of weapon systems Abstract Programmatic EIS for Stockpile Stewardship and Management, 1996
