Geographical Dimensions Of Terrorism:

The Geographical Dimensions of Terrorism Susan L. Cutter, Douglas B. Richardson, Thomas J. Wilbanks, 2014-02-04 Undertaken as part of the National Science Foundation's call for research associated with the 9/11 terrorist attacks this volume contains research that addresses the immediate role and utility of geographical information and technologies in emergency management. It also initiates an on-going process to help develop a focused national research agenda on the geographical dimensions of terrorism. Areas covered include geospatial data and technologies, infrastructure research, root causes of terrorism and vulnerability science and hazard research. *Dimensions of Terrorism* Alan O'Day, 2004 *Dimensions of Terrorism* sets out to establish some of the contours of modern terrorism. The articles do not provide all of the answers to what is and is not terrorism. They are not necessarily of a unified vision of what constitutes terrorism but taken as a group the difficulties of determining its limits and nature are given significant illumination. The authors address several major themes within terrorism: its definition, whether it is a distinct species of political violence or an extension of other forms of activity such as low intensity warfare; differing manifestations of terrorism; the question of whether it is a new form of the phenomena that has emerged since the end of the Cold War; to whom the use of the technique is most likely to appeal; and the character of persons who implement terror.

Essentials of Counterterrorism James J. F. Forest, 2015-10-21 A comprehensive overview of counterterrorism that examines key aspects of the fight against terrorism including intelligence, law enforcement, the military, financial and criminal activity, ethics and social media. Recent terrorist actions in the United States and abroad make it clear that the subject of counterterrorism is as vital and as timely as ever. Edited by a leading authority on terrorism and security studies, this compendium offers a wide-ranging look at the most vital aspects of counterterrorism from diplomacy and military action to the investigation and interdiction of terrorist finances. Following an introduction, chapters offer insightful discussions of strategy, policy, tactical and operational dimensions of counterterrorism. An interdisciplinary team of expert contributors examine a wide range of topics including lone wolf and homegrown terrorists, intelligence cooperation, social media, community policing, terrorism finance and the shadow economy. Case studies from Europe, Latin America, South Asia, the Middle East and the United States provide clear practical examples of effective and sometimes not so effective approaches to combating terrorism. The volume will serve as a central textbook for professional development courses, workshops and academic degree programs on terrorism, counterterrorism and security studies.

Hazards, Vulnerability and Environmental Justice Susan L. Cutter, 2012-05-04 From Hurricane Katrina and the south Asian tsunami to human-induced atrocities, terrorist attacks and the looming effects of climate change, the world is assailed by both natural and unnatural hazards and disasters. These expose not only human vulnerability, particularly that of the poorest who are least able to respond and adapt, but also the profound worldwide environmental injustices that result from the geographical distribution of risks, hazards and disasters. This collection of essays from one of the most renowned and experienced experts provides a

timely assessment of these critical themes Presenting the top selections from Susan L Cutter s thirty years of scholarship on hazards vulnerability and environmental justice the volume tackles issues such as nuclear and toxic hazards risk assessment communication and planning and societal responses Cutter maps out the terrain and draws out the salient themes with a fresh powerful introduction written in the wake of her work in the aftermath of Katrina This essential collection is ideal for professionals researchers academics and students working on hazards risk disasters and environmental justice across a range of disciplines

Environmental Hazards and Disasters Bimal Kanti Paul,2011-11-30 Environmental Hazards and Disasters Contexts Perspectives and Management focuses on manifested threats to humans and their welfare as a result of natural disasters The book uses an integrative approach to address socio cultural political and physical components of the disaster process Human and social vulnerability as well as risk to environmental hazards are explored within the comprehensive context of diverse natural hazards and disasters In addition to scientific explanations of disastrous occurrences people and governments of hazard prone countries often have their own interpretations for why natural disasters occur In such interpretations they often either blame others in order to conceal their inability to protect themselves or they blame themselves attributing the events to either real or imagined misdeeds The book contains a chapter devoted to the neglected topic of such reactions and explanations Includes chapters on key topics such as the application of GIS in hazard studies resiliency disasters and poverty climate change and sustainability and development This book is designed as a primary text for an interdisciplinary course on hazards for upper level undergraduate and Graduate students Although not targeted for an introductory hazards course students in such a course may find it very useful as well Additionally emergency managers planners and both public and private organizations involved in disaster response and mitigation could benefit from this book along with hazard researchers It not only includes traditional and popular hazard topics e g disaster cycles disaster relief and risk and vulnerability it also includes neglected topics such as the positive impacts of disasters disaster myths and different accounts of disasters and disasters and gender

China's Soft War on Terror Tianyang Liu,2021-11-29 This book explores how the Chinese government reasserts its control and management of public spaces as part of its overall counter terrorism strategy The work focuses primarily on the banal and alternative forms that China s war on terror takes the everyday non military socio economic and spatio material It presents three different cases of control associated with the state s effort to manage material social and digital public spaces as remedies to terrorism and ethnic unrest in China the redevelopment project of Kashgar the home of Uyghur culture from 2001 to 2017 the forging of local partnerships with potential agents i e the local cadres and imams in Xinjiang as part of the process of implementing counter terrorism policies and an online campaign about international terrorism that appeared on Sina Weibo Using securitization theory as a theoretical framework the book establishes links between human geography and critical security studies and advances the understanding of non confrontational forms of resistance in China It also focuses attention on the binary relationship

between the securitizing agency of the state and the counter securitization agency of terrorists while also exploring the manner in which other societal forces interact with these processes This book will be of interest to students of critical terrorism studies Chinese studies human geography and security studies **Geography** ,2010 **Geography 05/06**
