Ethnic Identity:

Ethnic Identity Anya Peterson Royce, 1982 Ethnic Identity Martha E. Bernal, George P. Knight, 1993-01-01 This book provides broad coverage of the various research approaches that have been used to study the development of ethnic identity in children and adolescents and the transmission of ethnic identity across generations The authors address topics of acculturation and the development and socialization of ethnic minorities particularly Mexican Americans They stress the roles of social and behavioral scientists in government multicultural policies and the nature of possible ethnic group responses to such policies for cultural maintenance and adaptation The Social Psychology of Ethnic Identity Maykel Verkuyten, 2004-12-01 In contrast to other disciplines social psychology has been slow in responding to the questions posed by the issue of ethnicity The Social Psychology of Ethnic Identity demonstrates the important contribution that psychology can make The central aim of this book is to show on the one hand that social psychology can be used to develop a better understanding of ethnicity and on the other hand that increased attention to ethnicity can benefit social psychology filling in theoretical and empirical gaps Based on recent research The Social Psychology of Ethnic Identity brings an original approach to subjects such as ethnic minority identity place space and time hyphenated identities and hybridity self descriptions and the ethnic self The combination of diverse approaches to this burgeoning field will be of interest to social psychologists as well as those interested in issues of identity ethnicity and migration *We are a People* Paul R. Spickard, W. Jeffrey Burroughs, 2000 As the twentieth century closes ethnicity stands out as a powerful force for binding people together in a sense of shared origins and worldview But this emphasis on a people's uniqueness can also develop into a distorted rationale for insularity inter ethnic animosity or as we have seen in this century armed conflict Ethnic identity clearly holds very real consequences for individuals and peoples yet there is not much agreement on what exactly it is or how it is formed The growing recognition that ethnicity is not fixed and inherent but elastic and constructed fuels the essays in this collection Regarding identity as a dynamic on going formative and transformative process *We Are a People* considers narrative the creation and maintenance of a common story as the keystone in building a sense of peoplehood Myths of origin triumph over adversity migration and so forth chart a group's history while continual additions to the larger narrative stress moving into the future as a people Still there is more to our stories as individuals and groups Most of us are aware that we take on different roles and project different aspects of ourselves depending on the situation Some individuals who have inherited multiple group affiliations from their families view themselves not as this or that but all at once So too with ethnic groups The so called hyphenated Americans are not the only people in the world to recognize or embrace their plurality This relatively recent acknowledgment of multiplicity has potentially wide implications destabilizing the limited and limiting categories inscribed in for example public policy and discourse on race relations *We Are a People* is a path breaking volume boldly illustrating how ethnic identity works in the real world Author note Paul Spickard is Professor and Chair of Asian American Studies at UC Santa Barbara and

is author of *Mixed Blood* W Jeffrey Burroughs Professor of Psychology at Brigham Young University Hawaii [The Social Psychology of Ethnic Identity](#) Maykel Verkuyten, 2018 Introduction Ethnic identity and social psychology Ethnicity Social identity The sense of ethnic identity Ethnic minority identity comparisons essentialism and settings Multiple group memberships The ethnic self dimensions and development Conclusion towards a better understanding *Racial and Ethnic Identity in School Practices* Rosa Hernández Sheets, Etta R. Hollins, 1999 This book demonstrates and explicates the work of scholars and practitioners who are exploring the interconnectedness of racial and ethnic identity scholarship to human development in order to promote successful pedagogical practices and services Racial and ethnic identity issues are brought directly to schooling so that teaching learning experiences psychological services and counseling practices within the educational process can be made more effective for a greater number of students By acknowledging that the racial and ethnic psychological experiences of individuals are consequential the volume Provides scholars and students in psychology educational psychology counseling and teacher preparation programs with current research on racial and ethnic identity formation and human development Explains why traditional theories of human development which lack racial and ethnic dimensions and which have evolved exclusively from a Eurocentric perspective are problematic Documents current best practices from psychology educational leadership counseling and teaching and classroom practices that support the claim that practitioners who are aware of racial and ethnic identity their own and others are better prepared to respond to students from their own background as well as those from other racial ethnic and cultural backgrounds Part I explains why the relationship among racial identity ethnic identity and human development is critical to schooling and provides the conceptual framework guiding and unifying subsequent chapters In Part II current research in racial and ethnic identity is presented and discussed Challenges and strategies for multicultural practices are the focus of Part III This book's goal is to help researchers practitioners and graduate students whose work directly intersects educational issues and the needs of children within the school environment to interpret and contextualize relevant research and theory and to bridge theory into practice

Ethnic Identity Richard D. Alba, 1990 Examines the changing role of ethnicity in the lives of Americans from a broad range of European backgrounds and the formation of a new European American ethnicity which has its own myths about its place in American history and its relation to the American identity **Ethnic Identity** George A. De Vos, Lola Romanucci-Ross, 1975 *Handbook of Adolescent Psychology, Volume 1* Richard M. Lerner, Laurence Steinberg, 2009-04-06 The study of and interest in adolescence in the field of psychology and related fields continues to grow necessitating an expanded revision of this seminal work This multidisciplinary handbook edited by the premier scholars in the field Richard Lerner and Laurence Steinberg and with contributions from the leading researchers reflects the latest empirical work and growth in the field **Ethnic Identity and Power** Yali Zou, Enrique T. Trueba, Henry T. Trueba, 1998-04-02 A stimulating comparative examination of the educational ramifications of cultural identity with implications for public policy *Ethnicity*

in College Anna M. Ortiz, Silvia J. Santos, 2023-07-03 This book explores the importance and construction of ethnic identity among college students and how ethnicity interfaces with students' interactions on campus and the communities in which they live. Based on qualitative interviews with White, Latina, African American, and Asian students, it captures both the college context and the individual experiences students have with their ethnicity through the immediacy of the students' own voices. The authors observe how students negotiate their ethnic identity within the process of becoming adults. They identify the influences of family, the importance of socio-historical forces that surround students' educational experiences, and the critical role of peers in students' ethnic identity development. While research has begun to document the positive outcomes associated with diverse learning environments, this study emphasizes and more closely delineates just how these outcomes come to be. In addition, the study reveals how the freedom to express and develop ethnic identity, which multicultural environments ideally support, promotes student confidence and achievement in ways which students themselves can articulate. This work is distinctive in eschewing an ethnic minority perspective through which Whites are the primary reference group and the standard from which all ethnic and racial identity processes evolve, as well as in considering the influences that growing up in a multi-ethnic context may have on ethnic identity processes, particularly where the other is not White. This perspective is particularly important at a time when students entering universities are more likely to come from highly segregated high school environments and will confront ethnic and social differences for the first time in college. This book is intended as a resource for researchers and practitioners in psychology and higher education. It offers insights for student affairs and higher education administrators and leaders about the ways in which their campus policies and practices can positively influence the development of more supportive campus climates that draw on the strengths of each ethnic group to create an overarching pluralistic culture. It can also serve as a cultural diversity text for upper division or graduate courses on pluralism. Moreover, understanding students' ethnic identity, their personal growth, and adjustment to college is central to preparing individuals for life in a pluralistic society. [Encyclopedia of Human Development](#) Neil J.

Salkind, 2005-10-14 The field of human development focuses on the growth and development of the human being, including physical, social, psychological, and emotional development. Under the broad umbrella of the term human development, you find countless topics that range from charting the emotional attachment of an infant to his or her parents and its long-term effects on well-being, media violence, and adolescents' behavior, or factors moderating the natural decline in physical and mental abilities associated with aging. The [Encyclopedia of Human Development](#) is the first comprehensive, authoritative, and informative reference work that presents state-of-the-art research and ready-to-use facts from the fields of psychology, individual and family studies, and education in a way that is not too technical. With more than 600 entries, this three-volume [Encyclopedia](#) covers topics as diverse as adolescence, cognitive development, education, family, gender differences, identity, longitudinal research, personality development, prenatal development, temperament, and more. **Key Features:** Provides cross

disciplinary coverage with contributions from experts in the fields of psychology education human development and family studies and gerontology Highlights classic studies and theories and provides brief biographies of notable researchers and theorists Takes a lifespan approach by including several anchor essays that cover specific phases of development such as prenatal infancy childhood adolescence early and middle adulthood later adulthood and aging Begins with an Introduction that details the scope rationale and audience for the work The cross disciplinary field of human development is one that captures interest among and holds practical relevance for the general public as well as academia therefore this engaging Encyclopedia will be a welcome addition to any academic or public library
