Culture and Sustainability in European Cities Svetlana Hristova, Milena Dragičević Šešić, Nancy Duxbury, 2015-04-21 European cities are contributing to the development of a more sustainable urban system that is capable of coping with economic crises ecological challenges and social disparities in different nation states and regions throughout Europe This book reveals in a pluralistic way how European cities are generating new approaches to their sustainable development and the special contribution of culture to these processes It addresses both a deficit of attention to small and medium sized cities in the framework of European sustainable development and an underestimation of the role of culture artistic expression and creativity for integrated development of the city as a prerequisite to urban sustainability On the basis of a broad collection of case studies throughout Europe representing a variety of regionally specific cultural models of sustainable development the book investigates how participative culture community arts and more generally creativity of civic imagination are conducive to the goal of a sustainable future of small and medium sized cities This is an essential volume for researchers and postgraduate students in urban studies cultural studies cultural geography and urban sociology as well as for policymakers and practitioners wanting to understand the specificity of European cities as hubs of innovation creativity and artistic industriousness

Handbook of European Societies Stefan Immerfall, 2009 European integration is one of the most ambitious and socially far reaching developments in world politics and in world economics Against growing opposition and despite increasing social heterogeneity the European Union continues to expand and to acquire new competences But to what extent is the self proclaimed ever closer union among the peoples of Europe a social reality In which ways is the political European project anchored in social developments How does social change impinge upon political integration Societal trends in multi cultural multi ethnic multi lingual and socially diverse Europe have never been studied systematically Handbook of European Societies Social Transformations in the 21st Century sets to rectify this neglect of societal developments in Europe providing a groundwork for the sociology of European integration The book portrays social life and social relations in the enlarged Europe and gives a perspective on the European Union as an evolving social entity Handbook of European Societies is a pioneering source book analyzing the current social patterns on the continent It covers a representative selection of major topics of social concern and sociological relevance such as Collective Action Consumption Identity Power Structure Sexuality Stratification and Well being Each contribution probes key developments in a strictly comparative manner The Handbook thus offers a detailed look into the intricacies of the national societies of Europe and into the prospect of an emerging European society The Editors have enlisted leading researchers to synthesize existing

Methods for Multilevel Analysis and Visualisation of Geographical Networks Céline Rozenblat,Guy Melancon,2013-06-03 This leading edge study focuses on the latest techniques in analysing and representing the complex multi layered data now available to geographers studying urban zones and their populations The volume tracks the successful results of the SPANGEO Project which was set up in 2005 to standardize and share the syncretic multinational mapping techniques already developed by geographers and computer scientists SPANGEO sought new and responsive ways of visualising urban geographical and social data that reflected the fine grained detail of the inputs It allowed for visual representation of the large and complex networks and flows which are such an integral feature of the dynamism of urban geography SPANGEO developed through the visual analytics loop in which geographers collaborated with computer scientists by feeding data into the design of visualisations that in turn spawned the urge to incorporate more varied data into the visualisation This volume covers all the relevant aspects from conceptual principles to the tools of network analysis and the actual results flowing from their deployment Detailed case studies set out in this volume include spatial multi level analyses of flows in airports and sea
