Zapruder Øyvind Vågnes, 2012-08-24 Winner Peter C Rollins Book Award 2012 As the fiftieth anniversary of the Kennedy assassination approaches the traumatic aspects of the tragedy continue to haunt our perceptions of the 1960s One reason for this lies in the home movie of the incident filmed by Abraham Zapruder a bystander who became one of the twentieth century's most important accidental documentarians The first book devoted exclusively to the topic Zapruder traces the journey of the film and its effect on the world's collective imagination Providing insightful perspective as an observer of American culture Norwegian media studies scholar Øyvind Vågnes begins by analyzing three narratives that are projections of Zapruder's images performance group Ant Farm's video The Eternal Frame Don DeLillo's novel Underworld and an episode from Seinfeld Subsequent topics he investigates include Dealey Plaza's Sixth Floor Museum Zoran Naskovski's installation Death in Dallas assassin video games and other artifacts of the ways in which the footage has made a lasting impact on popular culture and the historical imagination Vågnes also explores the role of other accidental documentarians such as those who captured scenes of 9/11 Zapruder's footage has never yielded a conclusive account of what happened in Dealey Plaza Zapruder thoroughly examines both this historical enigma and its indelible afterimages in our collective imagination

Investigations into the Origin of Language and Consciousness Trần Duc Thao, 2012-12-06 Trần Duc Thao a wise and learned scientist and an eminent Marxist philosopher begins this treatise on the origins of language and consciousness with a question One of the principal difficulties of the problem of the origin of consciousness is the exact determination of its beginnings Precisely where must one draw the line between the sensori motor psychism of animals and the conscious psychism that we see developing in man And then he cites Karl Marx's famous passage about the bee and the architect from Capital what distinguishes the worst architect from the best of bees is this that the architect raises his structure in the imagination before he erects it in reality At the end of every labor process we get a result that already existed in the imagination of the laborer at its commencement Capital Vol I p 178 tr Moore and Aveling

Thao follows this immediately with a second question But is this the most elementary form of consciousness Thus the conundrum concerning the origins of consciousness is posed as a circle if human consciousness pre supposes representation of the external reality of mental awareness of actions of what it may and if this consciousness emerges first with the activity of production using tools and if the production of tools itself pre supposes representation that is with an image of what is to be produced in the mind of the producer then the conditions for the origins of human
