

# Importance of Engineering design

---

- *Decisions made in the design process cost very little in terms of the overall product cost but have a major effect on the cost of the product.*

- *You cannot compensate in manufacturing for defects introduced in the design phase.*

(The design must be carried out so that the product can be made without defect at a competitive cost.)

- *The design process should be conducted so as to develop quality, cost-competitive products in the shortest time possible.*

(the longer a product is available for sale the more sales and profits there will be. )
