**Gorilla Pathology and Health** John E Cooper, Gordon Hull, 2016-12-21 Gorilla Pathology and Health With a Catalogue of Preserved Materials consists of two cross referenced parts The first the book itself is a review of pathological changes and tissue responses in gorillas Gorilla gorilla and G beringei with an emphasis on free living animals but also with reference to those in captivity The comparative aspects are discussed stressing the relevance of research to both gorillas and humans What makes the publication truly unique however is the second part a comprehensive descriptive catalogue of the location and nature of gorilla material in museums and scientific institutions throughout the world This is of great consequence because free living gorillas are strictly conserved with restricted access so the location of a wealth of preserved tissues and other material that has been collected over the decades is a great benefit for research and study This book can and should be used to gain cardinal knowledge regarding the biology and pathology of this genus The combination of book and catalogue in this extensive compilation makes it an invaluable tool for all those concerned with the health welfare and conservation of gorillas one of our nearest living relatives Brings together studies data and clinical practice from difficult to access or obscure journals and NGO reports in different languages for all interested parties and practitioners Provides perspectives on existing research in gorilla pathology both for those studying conservation practices and those seeking an understanding of comparable diseases in humans Includes illustrative figures on gross and microscopic pathological changes museum specimens photos of field necropsy and techniques and examples of laboratory tests Features an extensive list of references and further reading in different languages Incorporates a comprehensive descriptive catalogue of gorilla material from around the world

**I Totally Meant to Do That** Jane Borden, 2011-03-01 Jane Borden is a hybrid too horrifying to exist a hipster debutante She was reared in a proper Southern home in Greensboro North Carolina sent to boarding school in Virginia and then went on to join a sorority in Chapel Hill She next moved to New York and discovered that none of this grooming meant a lick to anyone In fact she hid her upbringing for many years it was easier than explaining what a debutante does the short answer not much Anyone who has moved away from home or lived in or dreamed of living in New York will appreciate the hilarity of Jane s musings on the intersections of and altercations between Southern hospitality and Gotham cool

**Hominin Postcranial Remains from Sterkfontein, South Africa, 1936-1995** Bernhard Zipfel, Brian G. Richmond, Carol V. Ward, 2020-05-07 The 1924 African discovery of an early hominin child s skull referred to as Australopithecus africanus by Raymond Dart was a major event in the history of paleoanthropology This provided the first evidence of early hominins in Africa and overturned conventional ideas about human evolution Subsequent discoveries of A africanus fossils notably from cave deposits at Sterkfontein yielded the first evidence that early hominins were habitual bipeds Fifty years after this the discovered wealth of fossil evidence in eastern Africa of the slightly older and craniodentally more primitive taxon A afarensis catalyzed debates about the origin and evolution of human gait and the phylogentic

relationships among early hominins This formed the main basis of our understanding of early hominin bipedality and paleobiology Little attention has been paid to the variation among species in postcranial anatomy and locomotion although intriguing hints are beginning to appear in the literature Did multiple varieties of bipedality evolve Did australopith species differ in positional or manipulative abilities body proportions or patterns of sexual dimorphism These are critical questions for understanding the evolution of australopiths and hominin locomotion In this book Bernhard Zipfel Brian Richmond Carol Ward and the most knowledgeable scholars in their respective fields provide groundbreaking accounts for each postcranial fossil and expert examinations into the background of each fossil The chapters include standardized high quality photographs and anatomical descriptions to allow readers to read the book entirely or learn by comparing features across chapters Hominin Postcranial Remains from Sterkfontein South Africa 1936 1995 is an evolutionary history of South African hominins and it offers readers an orientation and introduction to the field This is an important reference book for professional paleontologists paleobiologists anthropologists geologists students and historians interested in human evolution
