First Principles Of Cosmology

Robert Cummings Neville

First Principles Of Cosmology:

First Principles of Cosmology Eric V. Linder, 1997 An introduction to cosmology this text has an emphasis on the basic principles of the subject It seeks to explain the application of mechanics thermodynamics and particle physics to questions on the universe as a whole The volume also explores general equations of state unifying the treatment of dust radiation cosmological constant or exotic components and the treatment of inhomogeneities clumpy universe and their effects on observations

God the Creator Robert Cummings Neville, 1992-02-13 God the Creator provides a detailed exposition of a conception of God as the creator of everything determinate It does not defend an established conception such as the Thomist the Calvinist or the Process theological idea but rather elaborates the ancient theme of creation ex nihilo in a new form appropriate to the contemporary world Part one is a rigorous philosophical development of the idea of God as creator ex nihilo arguing that an adequate solution to the problem of the one and the many demands such a conception This part includes a dialectical examination of contemporary and classical theories of being Part two asks how one can have knowledge of the kind of God described previously it deals with experience analogy and dialectic Part three applies the conception developed in part one to fundamental religious conceptions such as the object of worship the nature of religion and the practices of private and public religious life It presents theories arising from the conception of creation ex nihilo for the interpretation of religious concern conversion faith certainty solitude bliss service liturgy providence evangelism dedication reconciliation brotherhood discipline the integration of public and private religion relative to other dimensions of life freedom love and glory Though the language arises from the Christian tradition and expresses an orthodox strand of that religion the argument weaves throughout the concerns of many world religions

[Nature and Divinity in Plato's Timaeus](#) Sarah Broadie, 2011-11-10 Plato's Timaeus is one of the most influential and challenging works of ancient philosophy to have come down to us Sarah Broadie's rich and compelling study proposes new interpretations of major elements of the Timaeus including the separate Demiurge the cosmic beginning the second mixing the Receptacle and the Atlantis story Broadie shows how Plato deploys the mythic themes of the Timaeus to convey fundamental philosophical insights and examines the profoundly differing methods of interpretation which have been brought to bear on the work Her book is for everyone interested in Ancient Greek philosophy cosmology and mythology whether classicists philosophers historians of ideas or historians of science It offers new findings to scholars familiar with the material but it is also a clear and reliable resource for anyone coming to it for the first time

[Philosophy and the Sciences for Everyone](#) Michela Massimi, 2014-09-25 What is the origin of our universe What are dark matter and dark energy What is our role in the universe as human beings capable of knowledge What makes us intelligent cognitive agents seemingly endowed with consciousness Scientific research across both the physical and cognitive sciences raises fascinating philosophical questions Philosophy and the Sciences For Everyone introduces these questions and more It begins by asking what good is philosophy for the sciences before examining the

following questions The origin of our universe Dark matter and dark energy Anthropic reasoning in philosophy and cosmology Evolutionary theory and the human mind What is consciousness Intelligent machines and the human brain Embodied Cognition Each chapter includes an introduction summary and study questions and there is a glossary of technical terms Designed to be used on the corresponding Philosophy and the Sciences online course offered by the University of Edinburgh this book is also a superb introduction to central topics in philosophy of science and popular science Recovery of the Measure Robert C. Neville,1989-08-15 Neville s most significant scholarly contribution is arguably his metaphysical theory of being or being itself a new theory that involves an original solution to the ancient problem of the one and the many He developed this theory for his PhD dissertation at Yale University graduated 1963 of which his first book God the Creator constitutes a substantial revision Exploring the implications of that theory has enabled him to produce a philosophy of nature that rivals Alfred North Whitehead s in scope and power as can be seen from his three volume Axiology of Thinking The first volume in that trilogy Reconstruction of Thinking 1981 was hailed by Donald W Sherburne editor of the corrected edition of Whitehead s Process and Reality as a truly important book It is the first genuinely neo Whiteheadian offering on a large systematic scale The second volume of the trilogy Recovery of the Measure Interpretation and Nature 1989 was also well received The prominent Confucian scholar and philosopher David L Hall wrote of it as follows Because of its timeliness the brilliance of its arguments and the profundity of its conclusions **Catalogue of All Books in the Circulating and Reference Departments of the Public School Library, Columbus ...** Columbus (Ohio). Public School Library,1897 **The Principia** Emanuel Swedenborg,1912 The Fortnightly Review ,1877 **The Intellectual World of Late Antique Christianity** Lewis Ayres,Michael W. Champion,Matthew R. Crawford,2023-10-26 The Intellectual World of Late Antique Christianity explores new perspectives on early Christian epistemology in relation to the changing discourses institutions and material culture of late antiquity Early Christian modes of knowing and ordering knowledge involved complex processes of appropriation reproduction and reconfiguration of Jewish and classical epistemologies This helped Christians develop cultures of interpretation and argument as textually oriented religious communities within the Roman Empire and beyond It laid an intellectual foundation that would be built upon and modified in a variety of later contexts Encompassing Greek Latin and Syriac Christianity and an historical arc that stretches from the New Testament to Bede this volume traces how diverse theological commitments resulted in distinctive Christian accounts of knowing It foregrounds the myriad ways in which early Christian epistemology was embedded in earlier intellectual traditions and forms of life and how they established norms for communal life and powerful ways of acting in the world *The Fortnightly* ,1877 **Popular Science Monthly** ,1909 **A History of Philosophy** Johann Eduard Erdmann,1897 **The Catholic Encyclopedia** Charles George Herbermann,Edward Aloysius Pace,Condé Bénoist Pallen,Thomas Joseph Shahan,John Joseph Wynne,Andrew Alphonsus MacErlean,1911 The Reflex ,1930 *Reflex* ,1930 *Theories of Americanization* Isaac Baer Berkson,1920

Contributions to Education ,1920 *A Manual of Modern Scholastic Philosophy* Université catholique de Louvain
(1835-1969). Institut supérieur de philosophie,1923 **A History of Philosophy: Modern philosophy** Johann Eduard
Erdmann,1890 **The Philosophy of A. N. Whitehead** L. V. Rajagopal,1966
