

HOW TO READ A SAFETY DATA SHEET

OSHA Brief

The Hazard Communication Standard (HCS) (29 CFR 1910.1201, revised in 2012), requires that the chemical manufacturer, distributor, or importer provide Safety Data Sheets (SDS) (formerly MSDs or Material Safety Data Sheets) for each hazardous chemical to be stored, used, or transported in the workplace. This information is contained on the SDS and is to be made available to employees who use hazardous chemicals by becoming familiar with the format and contents of the SDS.

The SDS includes information such as the properties of each chemical, the physical, health, and environmental health hazards, protective measures, and safety precautions for handling, use, and transport of the chemical. This information is contained on the SDS and is to be made available to employees who use hazardous chemicals by becoming familiar with the format and contents of the SDS.

Recent Communications Standard Safety Data Sheet Sections 1 through 9 contain general information about the chemical, identification, hazards, composition, safe handling practices, and emergency control measures. This information should be helpful to those that need to get the information quickly. Sections 9 through 11 and 14 contain other technical and scientific information, such as physical and chemical properties, stability and reactivity information, toxicological information, exposure control information, and other information. Information on the use of personal protective equipment associated with the chemical is provided where it is needed. When the product does not meet the criteria for classification for any hazard element.

The SDS must also contain Sections 12 through 15, to be consistent with the Globally Harmonized System of Classification and Labeling of Chemicals (GHS), but OSHA will not enforce the content of these sections because they contain matters handled by other agencies.

Section 1: Identification

- Recommendations on the conditions for safe storage, including any incompatibilities.
- Provide advice on specific storage requirements (e.g., ventilation requirements).

Section 8: Exposure Controls/Personal Protection

THIS SECTION INDICATES THE EXPOSURE LIMITS, ENGINEERING CONTROLS, AND PERSONAL PROTECTIVE EQUIPMENT THAT CAN BE USED TO MINIMIZE WORKER EXPOSURE.

- OSHA Permissible Exposure Limits (PEL), American Conference of Governmental Industrial Hygienists (ACGIH) Threshold Limit Values (TLV), and any other exposure limit used and recommended by the chemical manufacturers, importer, or employer preparing the safety data sheet, where available.
- Engineering and engineering controls (e.g., use local exhaust ventilation, or use any other technical system).
- Recommendations for personal protective measures to prevent illness or injury from exposure to chemicals, such as eye and face protective equipment (PPE) (e.g., appropriate use of eye, face, and/or respiratory protection, needed based on hazards and potential exposure).
- Any special requirements for PPE, protective clothing or equipment (e.g., type of glove material, such as nitrile, nitrile-butadiene gloves, or other type of the glove).

Section 9: Physical and Chemical Properties

THIS SECTION IDENTIFIES PHYSICAL AND CHEMICAL PROPERTIES ASSOCIATED WITH THE SUBSTANCE OR MIXTURE.
