The Environmental Implications of Privatization Magda Lovei, Bradford S. Gentry, 2002 Governments have increasingly come to recognize the economic potential and fiscal advantages of privatization Privatization under the right conditions can also yield environmental benefits and contribute to sustainable development This report contains a number of case studies which highlight the lessons learned about the environmental implications of privatization It stresses that privatization offers an opportunity for making strategic decisions with longer term impacts This report also emphasizes that integrating environmental and social considerations into the privatization process leads to more sustainable outcomes It also recommends strategies toward building on the positive linkages between privatization and environmental protection

Limits to Privatization Marianne Beishem, Oran R Young, Ernst Ulrich von Weizsacker, Matthias Finger, 2012-04-27 Limits to Privatization is the first thorough audit of privatizations from around the world It outlines the historical emergence of globalization and liberalization and from analyses of over 50 case studies of best and worst case experiences of privatization it provides guidance for policy and action that will restore and maintain the right balance between the powers and responsibilities of the state the private sector and the increasingly important role of civil society The result is a book of major importance that challenges one of the orthodoxies of our day and provides a benchmark for future debate **Urban**

Environment and Infrastructure Anthony G. Bigio, Bharat Dahiya, 2004 *Public-Private Partnerships* Paolo Urio, 2010-12-18 Public Private Partnerships aims to discover the conditions under which public private partnerships may provide a viable alternative to the provision of public services and infrastructures by the state while achieving efficient sustainable peaceful and equitable development in four transition countries China Poland Russia and Ukraine These countries have experienced command economy under communist rule for at least thirty years They have only recently introduced market mechanisms In spite of a huge literature in favor of public private partnerships in the west scientific empirical evidence is generally mixed and balanced Success or failure depends upon many factors that need to be identified and analyzed Moreover economic performance may be achieved at the expense of other criteria such as equity public scrutiny and accountability This research a cooperation between the University of Geneva and the United Nations is the first attempt to evaluate public private partnerships based upon a review of the literature in Europe documentary analysis and in depth interviews in the four countries with representatives of the public and private sectors as well civil society organizations

Corporate Accountability in the Context of Transitional Justice Sabine Michalowski, 2014-06-23 Corporate Accountability in the Context of Transitional Justice explores how corporations can be held accountable for their role in past human rights violations when a country is making a transition from conflict or repression to peace and democracy It breaks new ground in theorizing the linkages between the areas of transitional justice and corporate accountability and analyzing problems frequently arising where the two fields meet in practice for example where the role of corporations in past human rights

violations is examined by truth and reconciliation commissions or in the course of litigation The book provides an overview of the current trends in law and in legal and political discussion relating to both areas as well as in depth analysis of how tools of corporate accountability and transitional justice can complement each other in order to achieve the best outcomes for bringing justice to victims and lasting peace to societies The authors bring extensive experience from diverse professional backgrounds and jurisdictions to provide the first sustained attempt to address this link The book will be of interest to scholars practitioners policymakers and activists working in the areas of transitional justice corporate accountability and business and human rights
