[Exorbitant Enlightenment](#) Alexander Regier, 2018-12-06 *Exorbitant Enlightenment* compels us to see eighteenth and early nineteenth century literature and culture in new ways This book reveals a constellation of groundbreaking pre 1790s Anglo German relations many of which are so radical so exorbitant that they ask us to fundamentally rethink the ways we grasp literary and intellectual history especially when it comes to Enlightenment and Romanticism Regier presents two of the great untold stories of the eighteenth century The first story uncovers a forgotten Anglo German network of thought and writing in Britain between 1700 and 1790 From this Anglo German context emerges the second story about a group of idiosyncratic figures and institutions including the Moravians in 1750s London Henry Fuseli and Johann Caspar Lavater as well as the two most exorbitant figures William Blake and Johann Georg Hamann The books eight chapters show how these authors and institutions shake up common understandings of British literary and European intellectual history and offer a very different much more counter intuitive view of the period Through their distinctive conceptions of language Blake and Hamann articulate in different yet deeply related ways a radical critique of instrumental thought and institutional religion They also argue for the irreducible relation between language and the sexual body In each case they push against some of the most central cultural and philosophical assumptions then and now The book argues that when taken seriously these exorbitant figures allow us to uncover and revise some of our own critical orthodoxies

The Origins of Nationalism Caspar

Hirschi,2011-12-08 In this wide ranging work Caspar Hirschi offers new perspectives on the origins of nationalism and the formation of European nations Based on extensive study of written and visual sources dating from the ancient to the early modern period the author re integrates the history of pre modern Europe into the study of nationalism describing it as an unintended and unavoidable consequence of the legacy of Roman imperialism in the Middle Ages Hirschi identifies the earliest nationalists among Renaissance humanists exploring their public roles and ambitions to offer new insight into the history of political scholarship in Europe and arguing that their adoption of ancient role models produced massive contradictions between their self image and political function This book demonstrates that only through understanding the development of the politics scholarship and art of pre modern Europe can we fully grasp the global power of nationalism in a modern political context Ingenuity in the Making Richard J. Oosterhoff, José Ramón Marcaida, Alexander Marr, 2021-11-09

Ingenuity in the Making explores the myriad ways in which ingenuity shaped the experience and conceptualization of materials and their manipulation in early modern Europe Contributions range widely across the arts and sciences examining objects and texts professions and performances concepts and practices The book considers subjects such as spirited matter the conceits of nature and crafty devices investigating the ways in which ingenuity acted in and upon the material world through skill and technique Contributors ask how ingenuity informed the maker s knowledge tradition where the perilous borderline between the genius of invention and disingenuous fraud was drawn charting the ambitions of material ingenuity in a rapidly globalizing world Knowledge, Science, and Literature in Early Modern Germany Gerhild Scholz
