Fishers Face:

Fisher's Face Jan Morris, 2010-12-09 Admiral of the Fleet Lord Jacky Fisher 1841 1920 was one of the greatest naval reformers in history He was also a colossal figure to contemporaries both loved and loathed a man of exceptional charm presence and charisma Since the late 1940s Jan Morris has been haunted by his face with its startling combination of the suave the sneering and the self amused This evocation is both biography and a love letter a perfect expression of her passionate interest in mavericks and outsiders in travel ships and the glorious pageantry of the British Empire in its prime

Social protection to foster sustainable management of natural resources and reduce poverty in fisheries-dependent communities Food and Agriculture Organization of the United Nations, 2018-05-31 FAO Fisheries and Aquaculture Proceedings This report calls for a stronger conceptual framework to reconcile socio economic development and natural resource conservation in fisheries dependent communities It highlights the need for a better understanding of the links between these areas and explores how the alignment between social protection and fisheries policies can be promoted at country level

experience the impacts of the climate crisis Tackling important subjects of global concern the author presents a complex image of Peru's global seascapes as historical spaces comprising precarious worlds that expose people nonhuman species and places to unequal levels of harm He traces how powerful actors in Peru represent the ocean in ways that erase the systemic inequalities histories of uneven development and extractive violence that have shaped ocean life These erasures underscore the need for alternative representations of the ocean that highlight the engagements and commitments that make oceanic ecologies possible as well as the material relationships and unequal positions of different people and species within them The author analyzes a multitude of timely topics including waves and coastal development the circulation of ocean waste El Niño warming events and the extraction of jumbo squid This book also addresses expanding scholarly interest in the world's oceans as sites for thinking about social inequities environmental politics and multispecies relationships

Information and communication technologies for small-scale fisheries (ICT4SSF) - A handbook for fisheries stakeholders Tilley, A. and Roscher, M. (Ed.), The aim of this report is to present evidence towards how Information and Communication Technologies for Small scale Fisheries ICT4SSF might enable and support the implementation of the FAO's Voluntary Guidelines for Securing Sustainable Small Scale Fisheries in the Context of Food Security and Poverty Eradication SSF Guidelines We present case studies of ICT4SSF initiatives in different use areas to identify key themes and reflect on successes and failures There are very few baselines against which to compare fisher wellbeing and access before and after ICT initiatives and this gap is an important finding in this report Thus far success has only been assessed qualitatively and relatively in terms of uptake sustainability and local legitimacy Still some ICT4SSF initiatives presented in this document are closely aligned with the Principles for Digital Development and the objectives of the SSF Guidelines These initiatives highlighted that when ICTs are locally led or developed or co designed with end users and marginalised groups or strengthened already existing networks and technologies the potential for positive impact is much higher However there is much less evidence of proactive confrontation of inequality through data ownership Further there are very few examples of developing mechanisms for fishers and fish workers to hold access or own their data or legal mechanisms to recognise their ownership or protect them against misuse or manipulation
