

Network Node Manager i

Introducing Network Node Manager i (NNMI) delivers power for capabilities including NOC to manage modern networks. NNMI Support Things (enabling IoT) into centralized control centers, helping you streamline work to reduce costs, improve system uptime and cut network operations management.

Product Highlights

Reduce complexity and improve service levels by introducing a unified control center for network management. NNMI provides a single management instance for all network devices and services, including:

• Network configuration management
 • Network performance monitoring
 • Network security management
 • Network troubleshooting and diagnostics
 • Network reporting and analytics

- Single management instance for all network devices and services
- Management instance for all network devices and services

Key Features and Capabilities

Network Node Manager i (NNMI) provides a single management instance for all network devices and services, including:

- Single management instance for all network devices and services
- Management instance for all network devices and services

Network Node Manager i Technical Features

- Single management instance for all network devices and services
- Management instance for all network devices and services
- Single management instance for all network devices and services
- Management instance for all network devices and services
