WINTER

READING COMPREHENSION

Read the text and answer the questions.

Winter is a magical season when the world transforms into a snowy wonderland. When winter begins, temperatures drop, and people start wearing warm coats, scarves, and mittens. Snow falls from the sky, covering everything in sparkling white. Winter brings many fun activities. Children love to go outside to build snowmen, make snow angels, and have friendly snowball fights. Families often go sledding, skiing, or ice skating together. After spending time in the cold, it feels great to come inside and warm up with a cozy blanket and a cup of hot chocolate. Animals experience winter differently. Some animals, like bears, go into hibernation, sleeping for many weeks. Other animals, like deer, grow thicker fur to stay warm. Some birds, like robins and geese, fly south to warmer places. Winter can be chilly, but it's also a season of excitement and joy.

1- What kinds of clothes do people wear to stay warm in winter?

2- What are some activities that children enjoy doing in the snow?

3- What do families usually do together in winter?

4- How do bears prepare for winter?

5- Why do some birds fly south during the winter?

Excerpt from *Some Phases of Reading in the Elementary School 1919* Reprinted From the Series Published in the Educational Journal Because the Educational Journal is largely a principals magazine this article is addressed primarily to the elementary principal who desires to attack the problem of reading in his school As far as possible the writer wishes to put this into the form of a friendly talk rather than in the form of a finished essay so that while we may lose something in the way of style we may perhaps gain thereby in directness and simplicity First of all I should impress on the teachers of your building that reading is the most important subject with which we have to deal in the elementary school Unfortunately there is a tendency in this city as well as elsewhere to measure a child's progress if not actually to decide upon his fitness for promotion by his ability in arithmetic Now while arithmetic is a highly important subject and merits our best attention it is altogether conceivable that men and women may get along successfully in life with only a modicum of arithmetical skill Indeed the average person in adult life has little use for anything but the simple fundamental processes of addition subtraction and multiplication while reading functions to an enormous degree in the affairs of every day life not only in conducting the affairs of the working day but in the right employment of one's leisure Hence the position of so many teachers that reading as a subject is of relatively little importance beyond the first and second grades is hardly a tenable one In the next place I should point out to the teachers that reading is an extremely complex subject and one which is exceedingly hard to teach Nothing is easier than to distribute readers to a class and to call upon the individual members to read in turn with an occasional criticism by the teacher Such a lesson could hardly be called a reading lesson but it is considered so in unfortunately too many cases Again there is a lack of clear understanding that reading must be considered both from the standpoint of silent reading and oral reading Many teachers regard reading as synonymous with oral reading neglecting entirely the wide field of silent reading In the elementary school it is indeed necessary to devote considerable time to oral recitations in reading but the time given to oral reading should decrease from lower grades to higher grades and the time

given to silent reading increased from grade to grade until in the higher grades of the elementary school silent reading should receive most attention In adult life one s oral reading demands relatively an insignificant portion of our time while silent reading for information or for pleasure is an indispensable part of daily life Then too reading is complex in that the attempt to analyze a reading situation is not an easy task To discover why a child fails in reading and to prescribe an adequate remedy calls forth the best skill which the teacher possesses a task which is complicated by the truth that there is no panacea for poor reading but every case in a very real sense must be judged upon its own merits About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
