

them to have enough knowledge of weather to recognize unforeseen, hazardous conditions encountered en route, and make decisions which will bring about successful termination of the flight and not endanger themselves, their passengers, or their cargo.

d. The importance of weather to a pilot cannot be overemphasized. A large percentage of all aircraft accidents are attributable to ignorance concerning weather.

4. Reason for weather course.—*a.* Experience has shown that the fundamentals of meteorology cannot be grasped without first preparing the student for the subject. Weather for pilots cannot be set down as a simple set of rules that anybody can memorize. It is absolutely essential that some of the fundamental theory of weather be known and understood.

b. Rules are good things to have alongside a knowledge of the fundamental theory. By themselves, however, they are not sufficient. Rules are easily forgotten, and a pilot who depends on them may find death just around the corner. If he forgets his rules when tough going is encountered in flights, he will not be able to figure out what to do. If, on the other hand, a pilot knows the fundamental theory of meteorology, he will be able to determine which way to turn and what to do when flying through bad weather. That is, the situation may be correctly analyzed by the pilot, and he should not have to depend on memory, which is forever a human failing.

c. Since the theory of meteorology needs to be understood and since 75 percent of all would-be pilots lack the proper background for an understanding of this theory, a course to supply this background is necessary. Thus the principal aim of this course is a preparation for studies in meteorology. Since the importance of meteorology cannot be overemphasized, it follows that this course in physics will be fundamental to skillful and safe piloting.

QUESTIONS

1. Define science; physics; meteorology.
2. Why is this course in "Physics of Weather" essential to a student pilot?
3. Give essential differences between flying in wartime and peacetime.
