Gardner, Trevor R. Anderson, 2022-05-11 This book is a guide for educators on how to develop and evaluate evidence based

strategies for teaching biological experimentation to thereby improve existing and develop new curricula It unveils the

flawed assumptions made at the classroom department and institutional level about what students are learning and what

help they might need to develop competence in biological experimentation Specific case studies illustrate a comprehensive

list of key scientific competencies that unpack what it means to be a competent experimental life scientist It includes explicit

evidence based guidelines for educators regarding the teaching learning and assessment of biological research competencies

The book also provides practical teacher guides and exemplars of assignments and assessments It contains a complete

analysis of the variety of tools developed thus far to assess learning in this domain This book contributes to the growth of

public understanding of biological issues including scientific literacy and the crucial importance of evidence based decision

making around public policy It will be beneficial to life science instructors biology education researchers and science
