* You can use facts you know to solve difficult multiplication problems.

$3 \times 14 = ?$ I don't know! :(Break 14 into $9 + 5$

So now you can do $(3 \times 9) + (3 \times 5)$

$3 \times 9 = 27$ I know these! :)

$3 \times 5 = 15$ add these together

42

So $3 \times 14 = 42$

Distributive Property Lesson Ideas:

Basic Algebra and Geometry Made a Bit Easier Lesson Plans Larry Zafran, 2010 This is the fifth book in the Math Made a Bit Easier series by independent math tutor Larry Zafran It contains 50 abridged lesson plans covering basic algebra and geometry for a target audience of tutors parents and homeschoolers Each lesson plan includes all of the components of a typical classroom lesson such as aim motivation warm up exercises demonstrative examples questions for thought and discussion and connections to earlier and later material This book is intended to be used in strict conjunction with the fourth book of the series Basic Algebra and Geometry Made a Bit Easier Concepts Explained in Plain English The book assumes that the instructor actually knows the material him herself but could benefit from having a general guideline to follow The author makes a point of identifying the concepts which most students tend to find easy or difficult including suggestions on how to help with the latter The book includes an introduction describing how the book can be put to best use as well as a section on how to effectively work with students who are struggling with the material The author explains that for the vast majority of students the root of the problem can be traced back to never having fully mastered basic math concepts and skills The book's lessons make frequent reference to reviewing earlier books in the series as needed so that the student masters all of the prerequisite material

Lessons for Extending Multiplication Maryann Wickett, Marilyn Burns, 2001 Lessons games and activities to increase children's multiplication skills

Lessons Learned From Research on Mathematics Curriculum Denisse R. Thompson, Mary Ann Huntley, Christine Suurtamm, 2024-09-16 This volume focuses on lessons learned from conducting research on mathematics curriculum covering design development analysis implementation and classroom enactment It offers frameworks tools techniques and solutions to challenges with insights from international authors to strengthen the mathematics research community

Number Sense Routines Jessica Shumway, 2023-10-10 Following up her best selling book Number Sense Routines Building Numerical Literacy Every Day in Grades K 3 Jessica Shumway turns her focus to upper elementary classrooms Number Sense Routines Developing Mathematical Understanding Every Day in Grades 3 5 is about tapping into every child's innate number sense and providing daily connected experiences that are responsive to children's learning needs Consistent Daily Routines Work Adaptable to any curriculum Shumway's 5 10 or 15 minute warm up routines are an easy and effective way to build and solidify students number sense foundations as a supplement to any program Planning and Facilitating Your Classroom No matter how familiar the routine Shumway provides insight on how to keep daily warm ups fresh She reveals careful thinking and planning that goes into each routine and offers detailed vignettes and dialogues of how they unfold in real classrooms Assessment Strategies As students engage in the process each routine becomes an exciting opportunity to gain insight into where they are in their understanding and help students articulate their mathematical thinking Identify Big Ideas Not only will these math routines help develop students mathematical understanding as they move towards using standard algorithms but teachers will learn to better recognize the big ideas that

emerge in discussions how to encourage important strategies based in number sense and how to facilitate conversations on key mathematical concepts These routines may appear in other places but I have never seen them written in such detail and with so many variations Although she makes what she does sound easy we all know that teaching math well is anything but easy It is challenging and complex Unpacking what students are saying helping them make connections not only to the math but to each other's ideas while simultaneously recording their ideas using mathematical models visuals or equations is no easy task Jessica provides wonderful visual examples of student work and so much more to help educators develop the tools they need to improve their practice and in so doing improve student learning From the Foreword by math coach and consultant Lucy West
