Land Use Planning:

Land-use Planning in Oregon Mitch Rohse,1987 **Making Governments Plan** Raymond J. Burby,Peter J. May,1997-11-14 In this book a team of scholars from five universities shows how new experiments in growth management can reinvigorate land use planning and help local governments find new solutions to the problems caused by growth and change Drawing on evidence from five states and scores of cities and counties the authors show why the benefits of growth are not automatic Much depends on how well states craft growth management legislation how amply programs are funded and how dedicated state officials are to working with localities By building on these findings they conclude states and localities can improve their chances for coping successfully with land use change *Land Use Planning* Theodore William Patterson,1988 **The Regulated Landscape** G. J. Knaap,Arthur C. Nelson,1992 This book examines the effects of Oregon s comprehensive Land Use Act of 1973 on economic activity housing agriculture and land values The authors document statewide planning and land use politics through the late 1980s as the state responded to changing social and economic circumstances that affected the implementation of its planning goals **Situations and Strategies in American Land-use Planning** Thomas K. Rudel,2009-04-16 Numerous analyses have identified local land use controls as the source of our continuing problems with residential segregation and environmental deterioration Although recent efforts to resolve these problems have focused on policy making in local government the existing literature on land use control provides little guidance for these efforts In this context *Situations and Strategies in American Land use Planning* meets a need From case studies of regulatory processes in rural rural urban fringe suburban and urban communities in Connecticut it develops an empirically grounded theory of land use planning which has clear implications for reforming the local planning process Thomas Rudel s book will be invaluable to all those involved in planning as well as being of interest to environmental and rural sociologists geographers and political scientists concerned with local government *Guidelines for Land-use Planning* Food and Agriculture Organization of the United Nations.
