

Headwater streams swiftly flow down steep mountain slopes and cut deep, v-shaped valleys. Waterfalls and rapids occur in this zone.

Lower-elevation streams merge to flow down gentle slopes. Valleys broaden as coalescing rivers start to meander.

At the lowest elevations, a river meanders across a broad, nearly flat valley and floodplain. At a river's mouth, it may divide into separate channels as it flows across a delta extending out to sea. The coastal plain and delta are made of river sediments.

Fluvial Processes and Environmental Change A.G. BROWN,1999      **Fluvial Processes and Environmental Change** A. G. Brown, Antony Brown, Timothy Quine, 1999-05-04 This volume consists of twenty chapters addressing different aspects of the theme of fluvial processes and environmental change The overall coverage is broad scientifically from modelling to alluvial dating geographically from arid zone flash flooding to glacial meltwaters and in time from contemporary process studies to the Quaternary The introductory chapter sets the context which is an attempt to show how studies of fluvial processes can help us in understanding and therefore predicting the impact of environmental change on our rivers riverine resources and landscapes Environmental change includes both climatic factors however caused and human impacts on river basins The differentiation of these two factors is discussed in several chapters whilst others take a more holistic approach Both climatic and human factors have and will remain to act together and so their interactions need to be understood Fluvial Processes and Environmental Change is divided into five sections commencing with the slope catchment scale and proceeding to studies of channel response then floodplain processes and floodplain response and finally two studies from glacierised basins The volume originated as a two day session of the British Geomorphological Research Group and contributors from Europe the USA and Australia were included in order to provide a wide perspective on the topic This book will be a valuable reference for postgraduates and researchers in fluvial geomorphology hydrology Quaternary science geology and environmental science

**Encyclopedia of Environmental Change** John A Matthews, 2013-12-13 Accessibly written by a team of international authors the Encyclopedia of Environmental Change provides a gateway to the complex facts concepts techniques methodology and philosophy of environmental change This three volume set illustrates and examines topics within this dynamic and rapidly changing interdisciplinary field The encyclopedia includes all of the following aspects of environmental change Diverse evidence of environmental change including climate change and changes on land and in the oceans Underlying natural and anthropogenic causes and mechanisms Wide ranging local regional and global impacts from the polar regions to the tropics Responses of geo ecosystems and human environmental systems in the face of past present and future environmental change Approaches methodologies and techniques used for reconstructing dating monitoring modelling projecting and predicting change Social economic and political dimensions of environmental issues environmental conservation and management and environmental policy Over 4 000 entries explore the following key themes and more Conservation Demographic change Environmental management Environmental policy Environmental security Food security Glaciation Green Revolution Human impact on environment Industrialization Landuse change Military impacts on environment Mining and mining impacts Nuclear energy Pollution Renewable resources Solar energy Sustainability Tourism Trade Water resources Water security Wildlife conservation The comprehensive coverage of terminology includes layers of entries ranging from one line definitions to short essays making this an invaluable companion

for any student of physical geography environmental geography or environmental sciences *Environmental Change and Tropical Geomorphology* Ian Douglas, Tom Spencer, 2020-05-11 The tropics provide the key to understanding much biological and Earth science This is particularly true for the study of landforms which in higher latitudes suffer great seasonal contrasts in process intensity and type and which often in the past underwent the dramatic changes of glaciation and periglaciation Yet studies in the tropics have shown that the legacy of past climate changes is much more dramatic than was formerly believed This book first published in 1985 brings together the variety of evidence about such environmental changes over a variety of timescales and sets it against the current knowledge of the nature of geomorphic processes in the tropics **Encyclopedia of Geomorphology** Andrew Goudie, 2013-04-15 Geomorphology the discipline which analyzes the history and nature of the earth's surface deals with the landforms produced by erosion weathering deposition transport and tectonic processes In recent decades there have been major developments in the discipline and these are reflected in this major Encyclopedia the first such reference work in the field to be published for thirty five years Encyclopedia of Geomorphology has been produced in association with the International Association of Geomorphologists IAG and has a truly global perspective The entries have been written by an international editorial team of contributors drawn from over thirty countries who are all among the leading experts in the discipline In two lavishly illustrated volumes Encyclopedia contains nearly 700 alphabetically organized entries to provide a comprehensive guide both to specific landforms and to the major types of geomorphological processes that create them The Encyclopedia also demonstrates the major developments that have taken place in recent years in our knowledge of tectonic and climatic changes and in the use of new techniques such as modelling remote sensing and process measurement Older concepts however are not forgotten and provide an historical perspective on the development of ideas Both accessible and authoritative Encyclopedia of Geomorphology is destined to become the definitive resource for students researchers and applied practitioners in the field of geomorphology and the cognate disciplines of geography earth science sedimentology and environmental science *Geospatial Techniques in Climate Change Monitoring and Environmental Mapping* Jung-Sup Um, Anindita Nath, Bappaditya Koley, Tanupriya Choudhury, 2025-12-03 *Geospatial Techniques in Climate Change Monitoring and Environmental Mapping Advances and Applications Volume Ten* delves into the novel methods and applications of remote sensing in climate change studies The book begins by exploring climate observation and monitoring consolidating remote sensing data systems for environmental mapping and tracking air pollution using remote sensing data The volume covers the use of remote sensing data for monitoring and predicting climate change characterizing land changes with climate time series data and tracking climate change and tropical cyclones with geospatial techniques It also discusses the system dynamics model of economic development and climate change as well as climate change mitigation adaptation and future directions Additionally it addresses climate modeling validation uncertainty mapping and the application of remote sensing data in government climate policies and sustainable risk reduction approaches for

**Geomorphology and Global Environmental Change** Olav Slaymaker, Tom Spencer, Christine Embleton-Hamann, 2009-07-02 A statement from the world's leading geomorphologists on the state of and potential changes to the environment

**Long-term Environmental Change in Arctic and Antarctic Lakes** Reinhard Pienitz, Marianne S.V. Douglas, John P. Smol, 2007-11-08 Concerns about the effects of global climate change have focused attention on the vulnerability of circumpolar regions Long term historical data are needed to better understand the magnitude and direction of environmental change related to both natural and anthropogenic causes as well as to assess patterns of natural variability The paucity of instrumental data requires that proxy methods be used The abundance of lakes throughout the Arctic and Antarctic makes paleolimnological approaches especially powerful tools to assist interpretations of environmental change This book provides a synthesis of the broad spectrum of techniques available for generating long term environmental records from circumpolar lakes It also provides overviews of the geographic extent of paleolimnological work completed thus far in these regions It explores the diverse ways in which paleolimnology is used to address the pressing and emerging environmental issues of high latitude regions By providing both an introduction and in depth reviews this volume is of interest to students and advanced researchers alike who are studying earth atmospheric and environmental sciences

**Palaeohydrology and Environmental Change** G. Benito, Victor R. Baker, K. J. Gregory, 1998-12-04 Paleohydrology is the study of how the composition distribution and movement of water many have influenced environmental change over time Using in depth case studies from North America Europe Asia and Australia this book explores paleohydrological reconstruction and its implications on past and future environmental change

**Geomorphic Processes and Riverine Habitat** Joseph M. Dorava, 2001-01-09 Published by the American Geophysical Union as part of the Water Science and Application Series Volume 4 Declines in fish populations and the loss of riverine habitat from human demands on the environment intensify year by year By considering why and how and by proposing restoration methods and mitigation strategies scientists respond forcefully to improve disturbed ecosystems Geomorphic Processes and Riverine Habitat presents results from recent research in fluvial geomorphology related to the assessment and characterization of riverine and riparian habitat and the response of biota to changes in their environment As our understanding of formative processes and

how humans occupy and shape the environment grows we can minimize our impact while enhancing our ability to restore and rehabilitate degraded river systems For scientists researchers and students of riverine habitat *Environmental Change and Geomorphology* Roland Baumhauer, Brigitta Schütt, 2002 *The Quaternary of Dumfries and Galloway* R. M. Tipping, 1999 **Physical Geography** K J Gregory, 2005-10-10 This four volume set begins by examining the knowledge of physical geography from the quantitative revolution to current state of mathematical models The principal environment spheres for example the biosphere are examined to show the greater concern with environmental dynamics now central to the discipline This work includes studies of environmental change looking at short term as well as longer term change and evaluating aspects of global change Volume IV focuses on the total physical environment examining human activity and human impact environmental hazards and applied physical geography **Proceedings of the Yorkshire Geological Society** Yorkshire Geological Society, 2000 Includes list of members in each vol *Geomorphology, Human Activity and Global Environmental Change* Olav Slaymaker, 2000-06-15 Demonstrates that the land based geomorphological evidence of environmental change from late Pleistocene Holocene historical and contemporary time periods remain central to a full understanding of global environmental change both at the global and regional scale Includes case studies from Europe North America and Asia *The Ecology and Management of Wood in World Rivers* Stan Gregory, Kathryn Louise Boyer, Angela M. Gurnell, 2003 **Proceedings of the Society of Antiquaries of Scotland** Society of Antiquaries of Scotland, 2005 Includes List of members **Environmental Change in Drylands** Andrew C. Millington, Kenneth Pye, 1994-06-30 Encompasses a wide ranging selection of peer reviewed papers covering geomorphology and biogeography including research which has sought to integrate the two disciplines The main division of articles has been made in terms of timescales of the studies in which the majority of evidence presented relates to environments before the last 1000 years **Geomorphology for Engineers** P. G. Fookes, E. Mark Lee, George Clinton Milligan, 2005-04 This book presents a comprehensive view of geomorphology for engineers and other professionals involved in near surface engineering problems associated with various landscapes It is a key reference work for practitioners and academics in civil geotechnical foundation engineering soil and rock mechanics and engineering geology It will also appeal to post graduates in geomorphology civil engineering and geohydrology as well as practising physical geographers and geologists *Antiquity* Manuel Vaquero, A.J.
