Featherweights Light Mobile And Floating Architecture:

Featherweights Oliver Herwig, 2003 From Bruno Taut's glass house to the Crystal Palace geodesic domes to the Millennium Dome this lavishly illustrated exploration of lightness in architecture explains how and why the movement began and shows where it will take us in the future Architecture has been moving towards lightness since the beginning of the twentieth century As new building materials become available and as land disappears architects have focused on efficiency impermanence and flexibility in structures Illustrating the achievements of the most visionary architects of the past and present Featherweights traces the evolution of lightness in architecture from the fantastic glass structures of the early twentieth century to the latest hi tech materials for the third millennium Covering everything from pre fab houses to inflatable buildings utopian architecture to virtual cities this fascinating exploration illustrates the ongoing dialogue between shelter and society and offers exciting glimpses into a future in which gravity is optional *Portable Architecture* Robert Kronenburg, 2008-05-16 This book discusses the forerunners present context and technology of portable architecture It documents numerous international examples organized by areas of application and offers a broad array of suggestions for practical design **Transportable Environments 3** Robert Kronenburg, Filiz Klassen, 2006 An overview of structures designed to be mobile their uses and the principles involved in their design including a consideration of the wide range of applications in which they can be found **Dwell**, 2003-06 At Dwell we're staging a minor revolution We think that it's possible to live in a house or apartment by a bold modern architect to own furniture and products that are exceptionally well designed and still be a regular human being We think that good design is an integral part of real life And that real life has been conspicuous by its absence in most design and architecture magazines **Retrofitting the City** Stefan Bouzarovski, 2015-11-25 Cities are responsible for three quarters of the world's energy consumption If we are to reduce our demands on the planet's resources how can we make our urban areas more energy efficient One way is to refit existing buildings with more thermally efficient building materials But such retrofitting involves significant issues of social acceptance and public participation Retrofitting the City provides an important corrective to the assumptions that have been made concerning the ability of people and places to cope with such residential transformation Drawing upon case studies from a number of European cities that have undergone far reaching change in their built environments the author shows that supposedly inadapted people and places show a strong if often hidden degree of flexibility in responding to economic change and building transformation **Architecture from the Inside Out** Karen A. Franck, R. Bianca Lepori, 2007 Previously published as *Architecture inside out* 2000 *New Tent Architecture* Philip Drew, 2008-05-27 Tents have been prized for centuries for their lightness mobility small footprint and structural elegance New tents offer innovative and significant solutions to age old problems With the demand on architects to touch the earth lightly together with a cross disciplinary interest in technotextiles membrane structures are assuming new prominence and pleasing forms This wide ranging

international survey looks at the exciting possibilities of contemporary tensile building and the most interesting membrane structures created in recent years Includes Architectural and cultural history of the tent Thirty recent projects grouped by theme such as atrium covers and fabric walls ring roofs and convertibles small peaks large waves Accessible text descriptions photographs and line drawings New Tent Architecture will be valued by architecture and design professionals engineers and students everywhere **Blueprint** ,2003 **Architectural Publications Index** ,2003 **Critical Regionalism** Liane Lefavre,Alexander Tzonis,2003 This richly illustrated and designed book in the Architecture in Focus series reconsiders critical regionalism and demonstrates the global viability of one of the most visible trends in contemporary architecture As globalization increasingly enters every facet of our lives its homogenizing effects on architecture urban spaces and the landscape have compelled architects to embrace the principles of critical regionalism an alternative theory that respects local culture geography and climate In this reexamination of critical regionalism two prominent architectural critics argue for a truce between the seemingly antithetical philosophies of critical regionalism and globalization The authors trace the genesis of critical regionalism to its ancient historical and political roots and focus on its modern expression in the works of Alvar Aalto Richard Neutra Oscar Niemeyer and others They point to the increasing use of the theory in the recent works of a truly global selection of visionary architects including Santiago Calatrava in Spain Renzo Piano in the South Pacific and Berger and Parkkinen in Germany Discussions of Tropical Architecture and contemporary work in Asia round out this important contribution to a topical debate about architecture s role in the world Amazon **Library Journal** ,2006 Includes beginning Sept 15 1954 and on the 15th of each month Sept May a special section School library journal ISSN 0000 0035 called Junior libraries 1954 May 1961 Also issued separately **FX** ,2003 **International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences** ,2004 De Architect ,2004 **American Book Publishing Record** ,2004 **Ark** ,2003 **Bibliographic Index** ,2007 **The British National Bibliography** Arthur James Wells,2003 **Der Baumeister** ,2003-07 *Baumeister* ,2003
