**Maxwell's Understanding Environmental Health: How We Live in the World** Deborah Alma Falta, 2021-03-25

Offering a unique approach to presenting environmental health Maxwell's *Understanding Environmental Health: How We Live in the World* Third Edition is structured around the choices we make as individuals that result in environmental hazards. By detailing the hazards of energy production, industry, food production, and our modern lifestyle in the context of our place within the local and global community, new author Deborah Falta updates and builds on Maxwell's comprehensive overview of environmental health by telling a connected narrative that makes the text both engaging and accessible to a broad range of students with a variety of scientific backgrounds. Awarded first place in the 2021 AJN Book of the Year Awards in the Environmental Health category. Read the press release. 15 new case studies addressing contemporary issues from plastic recycling to sustainably feeding a growing world population. New chapter detailing the societal and economic factors related to managing environmental risks. More comprehensive discussion of occupational health in the context of producing manufactured goods. New full color design that brings charts, graphs, and photos to life. Updated appendix includes a new overview of the U.S. regulatory framework for environmental health. Navigate eBook Access enabling you to read your digital textbook online or offline on computers, tablets, and mobile devices. Watch recording of her recent webinar *Making Environmental Health Resonate for Today's Students* to learn how Dr. Falta engages her students in environmental health topics through surveys, case studies, and more. *Environmental Health* Dade W. Moeller, 2005. Environmental Health has established itself as the most succinct and comprehensive textbook on the subject. This extensively revised and rewritten third edition continues this tradition by incorporating new developments and by adding timely coverage of topics such as environmental economics and terrorism. As in previous volumes, the new edition presents balanced assessments of environmental problems, examining their local and global implications, their short and long range impacts, and their importance in both developed and less developed countries of the world. The Third Edition also addresses emerging issues such as environmental justice, deforestation, the protection of endangered species, multiple chemical sensitivity, and the application of the threshold concept in evaluating the effects of toxic and radioactive materials. Whether discussing acid rain, ozone depletion, global warming, or more traditional subjects such as the management and control of air, water, and food, Dade Moeller emphasizes the need for a systems approach. As with previous volumes, *Environmental Health* Third Edition offers a depth of understanding that is without peer. While it covers technical details, it is also a book that anyone with an interest in the environment can pick up and browse at random.
