49 Myths about China Marte Kjær Galtung, Stig Stenslie, 2014-11-13 Communism is dead in China China Inc is buying up the world China has the United States over a barrel The Chinese are just copycats China is an environmental baddie China is colonizing Africa Mao was a monster The end of the Communist regime is near The 21st century belongs to China Or does it Marte Kjær Galtung and Stig Stenslie highlight 49 prevalent myths about China's past present and future and weigh their truth or fiction Leading an enlightening and entertaining tour the authors debunk widespread knowledge about Chinese culture society politics and economy In some cases Chinese themselves encourage mistaken impressions But many of these myths are really about how we Westerners see ourselves inasmuch as China or the Chinese people are depicted as what we are not Western perceptions of the empire in the East have for centuries oscillated between sinophilia and sinophobia influenced by historical changes in the West as much as by events in China This timely and provocative book offers an engaging and compelling window on a rising power we often misunderstand

China's Millions, 1900 *The Coming China Wars* Peter Navarro, 2008-04-24 For

years China has served as the factory floor for global production driving down prices for consumers worldwide But unfortunately China s rapid and chaotic industrialization has put it on a collision course with the rest of the world The Coming China Wars was the first book to systematically cover all those conflicts political economic and environmental Now in this new edition Dr Peter Navarro has thoroughly updated the entire book You ll find new chapters on the danger posed by China s flood of defective products and contaminated food China s dramatic military expansion and the rising threat of a hot war China s space program and its profound strategic implications China s growing suppression of human rights and free speech and much more The coming China Wars will be fought over everything from decent jobs livable wages and advanced technologies to strategic resources and eventually to our most basic of all needs bread water and air Unless all nations immediately address these impending conflicts the results may be catastrophic Like the First Edition this book demands that we think much more deeply about how to stop the coming China Wars laying out hard choices that must be made sooner rather than later This new edition offers even more policy recommendations including original contributions from several of the world s most important China experts
