Electro-optical Imaging System Performance Gerald C. Holst, 2006 **Electro-optical Imaging System Performance**
Gerald C. Holst, 1995 This updated edition is a consolidation of reference material needed to design analyze and evaluate imaging system performance The information is integrated from a wide range of subjects in which the analyst must be conversant target characterization atmospheric effects optics detectors electronics displays and human perception of image quality The material could otherwise only be obtained by sifting through dozens of textbooks and journal articles Although emphasis is placed on infrared systems the principles apply to all imaging systems operating in the visible region of the spectrum Electro-optical Imaging System Performance Gerald C. Holst, 2008 *Electro-optical Imaging* Lucien M. Biberman, 2000 This volume contains the significant technical literature that traces the development of both low light level and infrared imaging technology as well as the modeling of these systems and their performance over the past 30 years Biberman a foremost contributor to the nation s capability in infrare **Electro-Optical Imaging System Performance**
Holst GC., 2000 **Electro-optical Imaging System Performance** Gerald C. Holst, 2006 Introduction to Infrared and Electro-optical Systems Ronald G. Driggers, Melvin H. Friedman, Jonathan Nichols, 2012 This comprehensive reference details the principles and components of the Linear Shift Invariant LSI infrared and electro optical systems and shows you how to combine this approach with calculus and domain transformations to achieve a successful imaging system analysis Ultimately the steps described in this book lead to results in quantitative characterizations of performance metrics such as modulation transfer functions minimum resolvable temperature difference minimum resolvable contrast and probability of object discrimination The book includes an introduction to two dimensional functions and mathematics which can be used to describe image transfer characteristics and imaging system components You also learn diffraction concepts of coherent and incoherent imaging systems which show you the fundamental limits of their performance By using the evaluation procedures contained in this desktop reference you become capable of predicting both sensor test and field performance and quantifying the effects of component variations *Electro-optical Systems Performance Modeling* Gary Waldman, John Wootton, 1993 This book demonstrates how to model the entire target acquisition process using either visible or infrared imaging systems Beginning with an overview on electro optical system design the text introduces the complexity of various design considerations A discussion of the differing types of visible and infrared sensors outlines basic wavelength issues and provides definitions of baseline hardware solutions **Electro-optical Imaging Systems Integration** Ralph Wight, 1987
 Staring Arrays Electro-optical Imaging System Performance Gerald C. Holst, 2017 **An Improved Electro-Optical Image Quality Summary Measure** Alan H. Blumenthal, Stephen B. Campana, NAVAL AIR DEVELOPMENT CENTER WARMINSTER PA SENSORS AND AVIONICS TECHNOLOGY DIRECTORATE., 1981 The operational performance of electro optical imaging systems is currently predicted using models based on an approach introduced by Johnson in 1958

This model has been shown to be inadequate when used to predict performance over a wide range of conditions of signal to noise ratio and range to the target This paper describes our efforts to develop and validate a model which is more effective than the Johnson model in predicting image quality Implications in performance prediction modeling and electro optic sensor design tradeoffs between sensitivity and resolution are also discussed Author **Medical Infrared Imaging** Mary Diakides, Joseph D. Bronzino, Donald R. Peterson, 2012-12-12 The evolution of technological advances in infrared sensor technology image processing smart algorithms knowledge based databases and their overall system integration has resulted in new methods of research and use in medical infrared imaging The development of infrared cameras with focal plane arrays no longer requiring cooling added a new Active Electro-optical Systems Clifton S.
