Greek Way Of Death:

The Greek Way of Death Robert Garland,1985 Beschrijving van het uitgebreide begrafenisritueel bij de Grieken in de periode van Homerus tot de 4e eeuw v C *The Greek Way of Death* Robert Garland,1988 *The Greek Way of Death* Robert Garland,2001 Death for the Greeks was not an instantaneous event rather a process or passage which required strenuous efforts on the part of the living to ensure that the dead achieved full and final transfer to the next world The central questions which this book attempts to answer are the extent to which death was a preoccupying concern among the Greeks the feelings with which the individual may have anticipated his death the nature of the bonds between the living and the dead and the light shed by burial practices upon characteristic elements of Greek society While the beliefs of ordinary Greeks about their ordinary dead form the book s central focus there is also a chapter on special dead the unburied murderers and their victims children and suicides BOOK JACKET **The Greek Way of Life** Robert Garland,1990

Death in Second-Century Christian Thought Jeremiah Mutie,2015-07-30 Death in Second Century Christian Thought explores how the meaning of death was conceptualised in this crucial period of the history of the church Through an exploration of key metaphors and other figures of speech that the early church used to talk about this fascinating and controversial topic Jeremiah Mutie argues that the church fathers selected adapted and exploited existing pagan ideas about the subject of death in order to offer a distinctively Christian view based on Biblical texts The death burial and resurrection of Jesus were critical to this development as was the Christian promise of eternal life In this erudite book Mutie shows how Christians engaged with the views of death in late antiquity coming up with their own characteristic belief in life after death

The Impact of Bodily Experience on Paul's Resurrection Theology Kai-Hsuan Chang,2021-09-23 Kai Hsuan Chang engages with the longstanding scholarly debate concerning the development of Paul s resurrection theology by investigating the correlation between his bodily experiences and his diverse articulations about resurrection Drawing on insights from cognitive linguistics Chang considers Paul s ideas about resurrection as fundamentally grounded in recurrent patterns of bodily experience arguing that such experience of some religious activities in Paul s time death rites spirit possession and baptism contributed to the formation and development of his resurrection theology Chang demonstrates that developments in Paul s ideas about bodily transformation at resurrection reflected in 1 Corinthians 15 resulted from a change in the experiential patterns on which his new idea is constructed rather than transformation during heavenly ascent as seen in Jewish traditions of resurrection He thus applies cognitive linguistic tools to two considerations first whether Paul had contextual reasons to generate his innovation in 1 Corinthians 15 and second whether Paul s innovation recurred or had continual effects in Christian groups In so doing Chang shows that Paul s innovation directly addressed a contextual issue of death rites in Corinth and exerted a continuing effect on Paul s later ideas of transformation spirit possession and baptism
