Europe and the Roma Klaus-Michael Bogdal,2023-07-27

A magisterial contribution to the understanding of the cultural position of Romani people in Europe nothing short of astounding Literary Review This remarkable book describes a dark side of European history the rejection of the Roma from their initial arrival in the late Middle Ages to the present day To Europeans the Roma appeared to be in complete contradiction with their own culture because of their mysterious origins unknown language and way of life As representatives of an oral culture for centuries the Roma have left virtually no written records of their own Their history has been conveyed to us almost exclusively through the distorted images that European cultures project Persecuted and shunned the Roma nonetheless spread out across the continent and became an important indeed indispensable element in the European imagination It is impossible to conceive of the culture of Spain southern France and much of Central Europe without this pervasive Romani influence Europe and the Roma brilliantly describes the fascination and fear which have marked Europeans response to the Romani presence Countless composers artists and writers have responded to Romani culture and to fantasies thereof Their projections onto a group whose illiteracy and marginalization gave it so little direct voice of its own have always been a very uneasy mixture of the inspired the patronizing and the frighteningly ignorant The book also shows the link between cultural violence social discrimination and racist policies that paved the way for the genocide of the Roma

how gypsies became fortune tellers We may find a very curious illustration of it in the wren This is apparently as humble modest prosaic little fowl as exists and as far from mystery and wickedness as an old hen But the ornithologists of the olden time and the myth makers and the gypsies who lurked and lived in the forest knew better They saw how this bright eyed strange little creature in her elvish way slipped in and out of hollow trees and wood shade into sunlight and anon was gone no man knew whither and so they knew that it was an uncanny creature and told wonderful tales of its deeds in human form and to day it is called by gypsies in Germany as in England the witch bird or more briefly chori-hani the witch Just so the gypsies themselves with their glittering Indian eyes slipping like the wren in and out of the shadow of the Unknown and anon away and invisible won for themselves the name which now they wear Wherever Shamanism or the sorcery which is based on exorcising or commanding spirits exists its professors from leading strange lives or from solitude or wandering become strange and wild looking When men have this appearance people associate with it mysterious power This is the case in Tartary Africa among the Eskimo Lapps or Red Indians with all of whom the sorcerer voodoo or medaolin has the eye of the fascinator glittering and cold as that of a serpent So the gypsies from the mere fact of being wanderers and out of doors live in wild places became wild looking and when asked if they did not associate with the devils who dwell in the desert places admitted the soft impeachment and being further questioned as to whether their friends the devils fairies elves and goblins had not taught them how to tell the future they pleaded guilty and finding that it paid well went to work in their small way to improve their science and particularly their pecuniary resources It was an easy calling it required no property or properties neither capital nor capital shiners nor shrines wherein to work the oracle And as I believe that a company of children left entirely to themselves would form and grow up with a language which in a very few years would be spoken fluently 1 so I am certain that the shades of night and fear pain and lightning and mystery would produce in the same time conceptions of dreaded beings resulting first in demonology and then in the fancied art of driving devils away For out of my own childish experiences and memories I retain with absolute accuracy material enough to declare that without any aid from other people the youthful mind forms for itself strange and seemingly supernatural phenomena A tree or bush waving in the night breeze by moonlight is perhaps mistaken for a great man the mere repetition of the sight or of its memory make it a personal reality Once when I was a child powerful doses of quinine caused a peculiar throb in my ear which I for some time believed was the sound of somebody continually walking upstairs Very young children sometimes imagine invisible playmates or companions talk with them and actually believe that the unseen talk to them in return I myself knew a small boy who had as he sincerely believed such a companion whom he called Bill and when he could not understand his lessons he consulted the mysterious William who explained them to him There are children who by the voluntary or involuntary exercise of visual perception or volitional eye memory 2 reproduce or create images which they imagine to be real and this faculty is much commoner than is supposed In fact I believe that where it exists in most remarkable degrees the adults to whom the children

describe their visions dismiss them as fancies or falsehoods Even in the very extraordinary cases recorded by Professor HALE in which little children formed for themselves spontaneously a language in which they conversed fluently neither their parents nor anybody else appears to have taken the least interest in the matter However the fact being that babes can form for themselves supernatural conceptions and embryo mythologies and as they always do attribute to strange or terrible looking persons power which the latter do not possess it is easy without going further to understand why a wild Indian gypsy with eyes like a demon when excited and unearthly looking at his calmest should have been supposed to be a sorcerer by credulous child like villagers All of this I believe might have taken place or really did take place in the very dawn of man s existence as a rational creature that as soon as the frontal convolution of the brain which monkeys do not possess had begun with the genial tubercule essential to language to develop itself then also certain other convolutions and tubercules not as yet discovered but which ad interim I will call the ghost making began to act Genial they certainly were not little joy and much sorrow has man got out of his spectro facient apparatus perhaf it and talk are correlative he might as well many a time have been better off if he were dumb
