Ethics in Qualitative Research Dr Melanie Mauthner, Maxine Birch, Julie Jessop, Tina Miller, 2002-11-19 This book examines the theoretical and practical aspects of ethical dilemmas in qualitative research To many researchers ethics has been associated with following ethical guidelines and gaining ethics approval from academic bodies However the complexities of researching private lives and placing accounts in the public arena increasingly raise ethical issues which are not easily solved by rules and guidelines This book addresses the gap between research practice and ethical principles that inform it focusing on responsibility and accountability in applied feminist research practice The book explores ethical issues in research from a range of angles including Access and informed consent Negotiating participation Rapport The intentions of feminist research Epistemology and data analysis Tensions between being a professional researcher and a caring professional The book includes practical guidelines to aid ethical decision making rooted in feminist ethics of care Ethics in Qualitative Research is designed for academics professionals and students carrying out research and is a timely teaching text for ethics in research across the social sciences

Ethics in Qualitative Research Martyn Hammersley, Anna Traianou, 2012-05-17 All social researchers need to think about ethical issues Their salience has recently been increased by the pressures of ethical regulation particularly in the case of qualitative research But what are ethical issues And how should they be approached These are not matters about which there is agreement Ethics in Qualitative Research explores conflicting philosophical assumptions the diverse social contexts in which ethical problems arise and the complexities of handling them in practice The authors argue that the starting point for any discussion of research ethics must be the values intrinsic to research above all the commitment to knowledge production However the pursuit of inquiry is rightly constrained by external values and the book focuses on three of these minimising harm respecting autonomy and protecting privacy These external values are shown to be far from

unequivocal in character often in conflict with one another or with the commitments of research and always subject to situational interpretation and practical judgment Nevertheless it is contended that in the present challenging times it is essential that qualitative researchers uphold research values Martyn Hammersley is Professor of Educational and Social Research at The Open University Anna Traianou is Senior Lecturer in the Department of Educational Studies Goldsmiths University of London

Ethics of Qualitative Research Martin Tolich,Ron Iphofen,2020 Qualitative research ethics are more complex than biomedical research ethics Qualitative research s starting point is not found in implied informed consent and ethical assurances that limit a researcher subject relationship to the few moments beyond completing a survey Quite the opposite when subjects agree to participate in a qualitative research project either by signing a consent form or by consenting orally they establish a convoluted set of ethical assurances that are not fleeting By signing a consent form to take part in a qualitative research project the subject accepts a set of ethical assurances offered by the researcher that are enduring these assurances are diverse and technique specific each with their own variant of ethical issues Two of the most common techniques qualitative researchers use are one to one unstructured interviews and focus groups Both techniques ask open ended questions and often collect data via audio recording yet their ethical practice is dissimilar Whereas one on one interviews can offer strong ethical assurances since the interviewee has opportunities to withdraw remarks during the interview focus group participants opinions are made in public and cannot be unsaid Qualitative research s unique emergent research design and diversity of practice e g photovoice autoethnography narrative are so individualised they prove problematic for how institutional review boards appraise them evaluating only the procedural ethical considerations of a project not its emergent ethics in practice The immersive nature of their research requires emotional political and personal responsiveness often expressed by the exhortation to reflexivity
