between the development of prosodic and morphosyntactic knowledge as evidenced in the early speech of Dutch English German Portuguese Spanish Danish Islandic and Swedish children shedding new light on the relation between universal and language specific aspects of language acquisition Another section of this volume deals with new approaches to language acquisition using ERP techniques The papers discuss in detail the relation between the development of language skills and changes in neurophysiological aspects of the brain The potentials of these techniques for the development of new tools for an early diagnosis of children who are at risk for developmental language disorders are also pointed out The closing section contains a synopsis of interactionist approaches to language acquisition a discussion of the genetic and experiential origin of primitive linguistic elements in acquisition and a discussion of structural and developmental aspects of bird song in comparison to human language The two volumes making up Approaches to Bootstrapping present a state of the art interdisciplinary and cross linguistic overview of recent developments in first language acquisition research

The Targeting System of Language Leonard Talmy, 2024-04-09 A proposal that a single linguistic cognitive system targeting underlies two domains of reference anaphora speech internal and deixis speech external In this book Leonard Talmy proposes that a single linguistic cognitive system targeting underlies two domains of linguistic reference those termed anaphora for a referent that is an element of the current discourse and deixis for a referent outside the discourse and in the spatiotemporal surroundings Talmy argues that language engages the same cognitive system to single out referents whether they are speech internal or speech external Talmy explains the targeting system in this way as a speaker communicates with a hearer her attention is on an object to which she wishes to refer this is her target To get the hearer's attention on it as well she uses a trigger word such as this that here there or now The trigger initiates a three stage process in the hearer he seeks cues of ten distinct categories uses these cues to determine the target and then maps the concept of the target gleaned from the cues back onto the trigger to integrate it into the speaker's sentence achieving comprehension The whole interaction Talmy explains rests on a coordination of the speaker's and hearer's cognitive processing The process is the same whether the referent is anaphoric or deictic Talmy presents and analyzes the ten categories of cues and examines sequences in targeting including the steps by which interaction leads to joint attention A glossary defines the new terms in the argument
