Proceedings of the 1993 International Workshop on Intelligent User Interfaces Wayne D. Gray, William E. Hefley, Dianne Murray, 1992 **The Research Methods Knowledge Base** William M. K. Trochim, 1999 The Research Methods Knowledge Base is a comprehensive textbook that addresses all of the topics in a typical introductory undergraduate or graduate course in social research methods It covers the entire research process including formulating research questions sampling probability and nonprobability measurement surveys scaling qualitative unobtrusive research design experimental and quasi experimental data analysis and writing the research paper It also addresses the major theoretical and philosophical underpinnings of research including the idea of validity in research reliability of measures and ethics The Knowledge Base was designed to be different from the many typical commercially available research methods texts It uses an informal conversational style to engage both the newcomer and the more experienced student of research The web based version of this book is a fully hyperlinked text that can be integrated easily into an existing course structure or used as a sourcebook for the experienced researcher who simply wants to browse

Web Usability Handbook Mark Pearrow, 2007 Since the first edition of the Web Site Usability Handbook was published in 2000 there have been numerous changes in the technology world After the Dot Com bubble burst corporate training and education budgets were cut severely and investment in new technology businesses slowed down But today things have turned around again and behind the scenes at technology companies usability specialists are still quietly working to make the electronic world easier to manage This second edition provides the new insights and guidance needed to help make usability an effective and enjoyable journey Every word from the first edition of this book has been revised or at least heavily reconsidered and in many cases whole sections have been removed or rewritten entirely while other sections are completely new to this edition The casual and conversational tone of the first edition has also changed because the current

wave of usability specialists embodies a much higher degree of training and knowledge of basic science. The goals of the book however have not changed to train those concerned with usability how to understand it as one piece of the large technology puzzle that is affecting and shaping the human and natural worlds. Usability is an art and a science but it is also an obligation we have to society. Accessibility and usability form the foundation of human enabling technology that is technology that serves us rather than technology that we serve. Everything from understanding the human factors of design and how to generate user centered designs to accessibility usability metrics heuristic evaluation and testing are detailed. Whether you are a usability professional seeking methods for transforming data into change or a web designer seeking guidance for making your sites easier to navigate you will find information and practical tools you can apply to your own sites today.

Practice-Driven Research on Enterprise Transformation Frank Harmsen, Knut Grahlmann, Erik Proper, 2011-09-25 This volume constitutes the proceedings of the Third Working Conference on Practice Driven Research on Enterprise Transformation PRET held in Luxembourg on September 6 2010 as the industrial track of the 13th IEEE Conference on Commerce and Enterprise Computing CEC 2011. The third edition of PRET marks a close collaboration between academia and practice. With the specific purpose of mutual learning and crossfertilization top practitioners from industry were invited to submit case studies. To give them enough space for presentation only four academic papers were accepted. These papers were submitted with a length of 25 pages to enable a more detailed coverage of the related research and to stimulate further discussions during the conference. The topics covered are Enterprise Architecture Business and IT Alignment and Business Process Management and Evaluation.
