Legendary Creature — Efreet

Whenever Yusri, Fortune's Flame attacks, choose a number between 1 and 5. Flip that many coins. For each flip you win, draw a card. For each flip you lose, Yusri deals 2 damage to you. If you won five flips this way, you may cast spells from your hand this turn without paying their mana costs.

Fortunes Flames:

Flame and Fortune in the American West Gregory Simon,2017 Flame and Fortune in the American West creatively and meticulously investigates the ongoing politics folly and avarice shaping the production of increasingly widespread yet dangerous suburban and exurban landscapes The 1991 Oakland Hills Tunnel Fire is used as a starting point to better understand these complex social environmental processes The Tunnel Fire is the most destructive fire in terms of structures lost in California history More than 3 000 residential structures burned and 25 lives were lost Although this fire occurred in Oakland and Berkeley others like it sear through landscapes in California and the American West that have experienced urban growth and development within areas historically prone to fire Simon skillfully blends techniques from environmental history political ecology and science studies to closely examine the Tunnel Fire within a broader historical and spatial context of regional economic development and natural resource management such as the widespread planting of eucalyptus trees as an exotic lure for homeowners and the creation of hillside neighborhoods for tax revenue decisions that produced communities with increased vulnerability to fire Simon demonstrates how in Oakland a drive for affluence led to a state of vulnerability for rich and poor alike that has only been exacerbated by the rebuilding of neighborhoods after the fire Despite these troubling trends Flame and Fortune in the American West illustrates how many popular and scientific debates on fire limit the scope and efficacy of policy responses These risky yet profitable developments what the author refers to as the Incendiary as well as proposed strategies for challenging them are discussed in the context of urbanizing areas around the American West and hold global applicability within hazard prone areas
