About Turn, Forward March with Europe Jane M. O. Sharp, 1996 Following 1990s defence cuts Britain s armed forces are stretched quite severely Successive governments have preferred buying US nuclear technology and intelligence to working with European partners The US has disengaged from Europe leaving the NATO countries with no common purpose The contributors to this volume economists and defence analysts outline how UK governments need to establish priorities within budget constraints exploring a division of labour with European partners restructure the army towards forces suitable for low intensity interventions and peace support rationalize defence production and procurement adapt the bipolar Cold War arms control regimes to the new multipolar world and redefine the requirement for an independent British nuclear capability *Bulletin* Pennsylvania. The Halted March of the European Left Matt Myers, 2025-02-06 The European left seemed to be in rude health during the 1970s Never had so many political parties committed to representing the working class been in power simultaneously across the continent New forms of mobilisation led by female immigrant and young wage earners seemed to reflect the growing strength of the workers movement rather than its pending obsolescence Parties and trade unions grew rapidly as a diverse new generation entered the ranks Why did the left s forward march halt so abruptly The *Halted March of the European Left* shows how the left s defeats after the mid 1970s were not the inevitable result of de

industrialisation or more precisely the transition to a globalised and post Fordist world that abolished the working class as a great historical actor Choices that were made during a concentrated but decisive moment contributed to the left's lost battles The British French and Italian left managed the shift to a new era by marginalising those groups of workers who had invested it with hopes of social and political transformation Communist socialist and social democratic parties helped disempower the new components of the working class in workplaces in society in the political system and successfully disciplined their traditional working class supporters The left encountered a crisis of purpose and identity a sense of both defeat and lost opportunities and the dissolution of the idea of a community of fate amongst workers This book provides a comparative analysis of the left's fragmenting relationship with the working class and a feel for the culture of three leading industrial countries during a traumatic transition of late twentieth century history It concludes that decisions taken by the left during the 1970s contributed to the tragic inversion of the expected outcome of that hopeful decade
