Formal Techniques In Artificial Intelligence A Sourcebook:

Formal Techniques in Artificial Intelligence Ranan B. Banerji, 1990 Contrary to general opinion Artificial Intelligence research has often been carried out from a mathematical point of view and frequently incorporates techniques of theoretical computer science This book surveys various areas of Artificial Intelligence research describing formal techniques The areas chosen are most of those which have been or can be discussed with mathematical precision and clarity The authors are all active researchers in some cases international authorities in their respective areas The volume is much more than a collection of annotated bibliographies The papers survey the basic techniques of each field giving information that will facilitate further reading The areas covered are equations and identities in algebras mechanical theorem proving logical induction intelligent data bases qualitative reasoning program verification and synthesis automatic heuristic development and neural networks

Handbook of Automated Reasoning Alan J.A. Robinson, Andrei Voronkov, 2001-06-22 **Handbook of Automated Reasoning**

Functional Programming, Concurrency, Simulation and Automated Reasoning Peter E. Lauer, 1993-06-16 This collection of papers arose from a series of lectures for workers in computer science and other disciplines The lectures were intended to familiarize them with some of the most exciting advanced computer based systems for the conceptualization design implementation simulation and logical analysis of applications in these disciplines The collection presents some strong motivational points for the use of theory based systems in the areas of functional programming concurrency simulation and automated reasoning highlighting some of their advantages and disadvantages relative to conventional systems The papers are mostly the work of individuals who were among the originators of the systems presented The volume is intended as a contribution to narrowing the learning gap facing conventional computer users when they wish to use advanced theory based systems The papers are meant for a wide audience and should not require great mathematical sophistication for their comprehension The papers contain numerous references for those wishing to pursue a topic in greater depth

Development of Knowledge-Based Systems for Engineering Carlo Tasso, Edoardo R. de Arantes e Oliveira, 1998-05-08 The goal of the volume is twofold to help engineers to understand the design and development process and the specific techniques utilized for constructing expert systems in engineering and secondly to introduce computer specialists to significant applications of knowledge based techniques in engineering Among the authors are world famous experts of engineering and knowledge based systems development

Languages and Compilers for Parallel Computing Utpal Banerjee, David Gelernter, Alex Nicolau, David A. Padua, 1992 This volume contains the proceedings of the Fourth Workshop on Languages and Compilers for Parallel Computing held in Santa Clara California in August 1991 The purpose of the workshop held every year since 1988 is to bring together the leading researchers on parallel programming language design and compilation techniques for parallel computers The papers in this book cover several important topics including 1 languages and structures to represent programs internally in the compiler 2 techniques to

analyze and manipulate sequential loops in order to generate a parallel version 3 techniques to detect and extract fine grain parallelism 4 scheduling and memory management issues in automatically generated parallel programs 5 parallel programming language designs and 6 compilation of explicitly parallel programs Together the papers give a good overview of the research projects underway in 1991 in this field **Logic Programming** Maurizio Gabbrielli, Gopal Gupta, 2005-09-19 This book constitutes the refereed proceedings of the 21st International Conference on Logic and Programming ICLP 2005 held in Barcelona Spain in October 2005 The 25 revised full papers and 15 revised poster papers presented together with 4 invited papers and 7 abstracts of a poster session of a doctoral consortium were carefully reviewed and selected from 104 submissions The papers cover all issues of current research in logic programming Extra attention is given to novel applications of logic programming and work providing novel integrations of different areas Topics in Artificial Intelligence Associazione italiana per l'intelligenza artificiale. Congress, Marco Gori, Giovanni Soda, 1995-09-27 This book presents the refereed proceedings of the 4th Congress of the Italian Association for Artificial Intelligence AI IA 95 held in Florence Italy in October 1995 The 31 revised full papers and the 12 short presentations contained in the volume were selected from a total of 101 submissions on the basis of a careful reviewing process The papers are organized in sections on natural language processing fuzzy systems machine learning knowledge representation automated reasoning cognitive models robotics and planning connectionist models model based reasoning and distributed artificial intelligence
