It is primarily designed to provide a comprehensive straightforward and step by step presentation of mathematical concepts to engineers, scientists and general readers. It moves from simple to challenging areas with carefully tailored worked examples of different degrees of difficulty. Mathematical concepts are deliberately linked with appropriate engineering applications to reinforce their value and are aligned with topics taught in major overseas curriculums. This book is written primarily for students at levels 3 and 4 typically in the early stages of a degree in engineering or a related discipline or for those undertaking foundation degree, Higher National Certificate, HND, International Foundation Year, IFY and International Year One, IYO courses with math modules. It consists of seven parts: Basic concepts in Mathematics, Coordinate Geometry, Algebraic Expression and Equations, Surds, Indices and Logarithms, Polynomials, Trigonometry. Each chapter is devoted to a topic and can be used as a stand alone guide with no prior knowledge assumed. Additional exercises and resources for each chapter can be found online.
