Snow,2016 Preceded by Pediatric otolaryngology edited by Charles D Bluestone et al 4th ed c2003 The Psychobiology of Sensory Coding William R. Uttal,2014-06-27 Originally published in 1973 this book deals with what were even at that time the well known neural coding processes of the sensory transmission processes The book was written to demonstrate the common features of the various senses It concentrates on the most peripheral neural aspects of the senses starting with the physical transduction process and culminating in the arrival of signals at the brain Sound & Hearing R. Duncan Luce,2013-05-13 The major aim of this book is to introduce the ways in which scientists approach and think about a phenomenon hearing that intersects three quite different disciplines the physics of sound sources and the propagation of sound through air and other materials the anatomy and physiology of the transformation of the physical sound into neural activity in the brain and the psychology of the perception we call hearing Physics biology and psychology each play a role in understanding how and what we hear The text evolved over the past decade in an attempt to convey something about scientific thinking as evidenced in the domain of sounds and their perception to students whose primary focus is not science It does so using a minimum of mathematics high school functions such as linear logarithmic sine and power without compromising scientific integrity A significant enrichment is the availability of a compact disc CD containing over 20 examples of acoustic demonstrations referred to in the book These demonstrations which range from echo effects and filtered noise to categorical speech perception and total more than 45 minutes are invaluable resources for making the text come alive Behavioral Neuroscience Carl W. Cotman,James L

McGaugh,2014-04-24 Behavioral Neuroscience An Introduction provides a basic understanding of what is known about the means by which neurons communicate and about the nervous system which interprets integrates and transmits signals into meaningful and appropriate behaviors The book starts with an overview of the nervous system The text then describes the general operation and organization of the nervous system and some of the major types of neurons in the context of their systems The basic characteristics of neurons and how they communicate the processes and the basic integrative properties of defined groups of neurons and complex learning and memory are also considered The book further tackles the auditory somesthetic olfactory gustatory visual and motor systems the functions of the autonomic nervous system and the neuroendocrine system and the neural basis of two types of motivated behavior drinking and feeding The text also encompasses sleep and activity rhythms the development of the neural circuitry and its plasticity throughout life and the development of behavior Behavioral disorders and the aspects of the human nervous system which make man unique among all living creatures are also looked into Behavioral psychologists behavioral neuroscientists and psychobiologists will find the book invaluable
