Formative Centuries:

The Formative Years, 1607-1763 Clarence Lester Ver Steeg, 1965 *A History of Latin America to 1825*, 2011-08-24
The updated and enhanced third edition of *A History of Latin America to 1825* presents a comprehensive narrative survey of Latin American history from the region's first human presence until the majority of Iberian colonies in America emerged as sovereign states c 1825. This edition features new content on the history of women, gender, Africans in the Iberian colonies, and pre-Columbian peoples. Includes more illustrations to aid learning: over 50 figures and photographs, several accompanied by short essays. Concentrates on the colonial period and earlier, expanding coverage of the period and incorporating more social and cultural history with the political narrative. Part of The Blackwell History of the World Series. The goal of this ambitious series is to provide an accessible source of knowledge about the entire human past for every curious person in every part of the world. It will comprise some two dozen volumes, of which some provide synoptic views of the history of particular regions while others consider the world as a whole during a particular period of time. The volumes are narrative in form, giving balanced attention to social and cultural history in the broadest sense as well as to institutional development and political change. Each provides a systematic account of a very large subject, but they are also both imaginative and interpretative. The Series is intended to be accessible to the widest possible readership, and the accessibility of its volumes is matched by the style of presentation and production.

Drawing on case studies from ancient Egypt to present-day America, Asia, and Europe, this survey discusses concepts of sickness and forms of treatment in many cultures. Sheldon Watts shows that many medical practices in the past were shaped as much by philosophers and metaphysicians as by university-trained doctors and other practitioners. Subjects covered include Pharaonic Egypt and the pre-conquest New World, the evolution of medical systems in the Middle East, health and healing on the Indian subcontinent, medicine and disease in China, the globalization of disease in the modern world, the birth and evolution of modern scientific medicine. This volume is a landmark contribution to

the field of world history It covers the principal medical systems known in the world based on extensive original research
Watts raises questions about globalization in medicine and the potential impact of infectious diseases in the present day
