Beck, Thomas Richter, 2021-08-17 The downhill slide in the global price of crude oil which started mid 2014 had major
repercussions across the Middle East for net oil exporters as well as importers closely connected to the oil producing
countries from the Gulf Following the Arab uprisings of 2010 and 2011 the oil price decline represented a second major
shock for the region in the early twenty first century one that has continued to impose constraints but also provided
opportunities Offering the first comprehensive analysis of the Middle Eastern political economy in response to the 2014 oil
price decline this book connects oil market dynamics with an understanding of socio political changes Inspired by rentierism
the contributors present original studies on Bahrain Egypt Jordan Kuwait Lebanon Oman Qatar Saudi Arabia and the United
Arab Emirates The studies reveal a large diversity of country specific policy adjustment strategies from the migrant workers
in the Arab Gulf who lost out in the post 2014 period but were incapable of repelling burdensome adjustment policies to
Egypt Jordan and Lebanon who have never been able to fulfil the expectation that they could benefit from the 2014 oil price
decline With timely contributions on the COVID 19 induced oil price crash in 2020 this collection signifies that rentierism still
prevails with regard to both empirical dynamics in the Middle East and academic discussions on its political economy
