## **Governing Education:**

*Governing Education* Paul C. Bauman, 1996 The purpose of this work is to clarify issues and opportunities associated with changes in educational governance The work of scholars practitioners advisory groups and citizens come together around the politics of education

**Governing Educational Spaces** Hans-Georg Kotthoff, Eleftherios Klerides, 2015-12-14 The governance of education in many countries and regions of the world is currently in transition challenging histories remaking subjectivities and shaping possible futures This book provides an up to date analysis and discussion of the cutting edge theme of educational governance from an international comparative perspective The volume explores the landscape of educational governance in its broadest sense considering new forms of steering leadership and management assessment and evaluation teaching and learning knowledge creation and the realities and possibilities for different forms of political engagement The new spatial dynamics of education are explored in institutional settings such as schools and universities and via professional groupings such as teachers administrators and leaders The chapters in this book are based on the best peer reviewed papers and keynote speeches which were delivered at the XXVI Conference of the Comparative Education Society in Europe CESE in June 2014 in Freiburg Germany Comparative Education is uniquely situated to explore the emerging dynamics of educational governance within changing and newly emerging educational spaces because it provides the opportunity to learn more about different local national or regional educational processes and trajectories and to share knowledge about the logics ideologies and impacts of different techniques and regimes of governance across Europe and beyond Hans Georg Kotthoff is Professor of Comparative Education and School Pedagogy at the University of Education Freiburg Germany and President of the Comparative Education Society in Europe CESE since 2012 Eleftherios Klerides is Lecturer in Comparative Education and History of Education at the University of Cyprus and the Secretary Treasurer of the Comparative Education Society in Europe CESE

**Governing Higher Education: National Perspectives on Institutional Governance** Alberto Amaral, Glen A. Jones, B. Karseth, 2002-12-31 This is the most comprehensive international discussion of higher education governance ever published It presents a critical analysis of governance issues and reforms in Australia Belgium Canada France The Netherlands Norway Portugal the UK and the USA The book explores different theoretical perspectives and presents new empirical evidence on system and institutional governance issues

**Critical Analyses of Educational Reforms in an Era of Transnational Governance** Elisabeth Hultqvist, Sverker Lindblad, Thomas S. Popkewitz, 2017-10-20 This book represents a set of critical analyses of educational reforms where issues of transnational governance are of vital concern It focuses on different aspects of and practices in educational reform making and in particular on governing techniques and the working of new agencies such as supranational and multinational organizations In addition the book examines contemporary issues of immigration immigrants in the politics of schooling by reflecting on matters of migration and problematizing how concepts such as exclusion and abjection make the migrants appear failed

insufficient and even dangerous The book provides theoretical insights into critical relations between knowledge and power governance and governmentality and notions concerning educational systems as well as how these are compared The central themes of the book are models for organizing and reflecting on transnationalization and educational reforms In its discussion of those themes the focus lies on changing conceptions of education and the educational system on how school or teacher education is adapting to discourses of effectiveness and efficiency and on their transformation according to standardized templates Such changing conceptions define the meanings of education and educational progress they are important for the identification and analysis of educational knowledge and for critical discourses on education in society **Improving School Governance** Nigel Gann, 2003-10-04 This text is about governing schools about how a body made up of ordinary people with no professional educational experience can make a positive contribution to the management of schools The core of the book lays out a strategic model of school governance and considers the three key roles of planning monitoring and evaluating Practical examples and sample procedures which governing bodies can adapt are provided The book also looks at the accountability of governors their formal duties how they should behave in schools the crucial relationship between governors staff headteachers communities and local authority and the issue of inspection **Governing Public Schools** Jacqueline Danzberger, Michael W. Kirst, Michael D. Usdan, 1992 The role of the local school board in delivering quality education is examined in this booklet which provides a set of expectations and principles for drastic change in the role and operation of school boards Now that fundamental systemic change is being called for the performance of school boards is under greater scrutiny Following the preface and introduction chapter 1 analyzes national trends in changes external to schooling and new demands placed upon schools and their boards by business and other leadership sectors The interrelationships between education and other children's services for children's success are also explored Chapter 2 examines reform strategies of the 1980s particularly those implemented by Kentucky and Chicago The major theme of these reforms was the intensification of the existing system rather than restructuring Chapter 3 discusses state local relations and the fourth chapter presents governance lessons from Canada Great Britain and Japan The fifth chapter presents findings of a survey conducted from 1988-90 of 266 school boards from 16 states Superintendents from 128 of the districts completed a questionnaire The results indicate that local boards are weakest in the areas necessary for effectiveness in changed school systems Chapter 6 offers conclusions and recommendations for improving board performance and endorses state action that changes the roles and responsibilities of local boards One figure 15 tables and chapter endnotes are included Contains 61 references LMI

**Education 2020** Julie Allan, Valerie Harwood, Clara Rübner Jørgensen, 2019-09-30 A timely contribution to the debate on

educational governance and equality the World Yearbook of Education 2020 documents the significant changes that have occurred in the last 20 years reflecting a widespread shift from government to governance Considering school context as well as specific school responses around the emergence of particular forms of governance this book presents and contextualises a clear historical account of governance and accountability within schooling Organised into three sections covering Changing contexts of school governance stakeholders and responsabilisation and radical governance carefully chosen contributors provide global insights from around the world They consider educational outcomes and closing the inequality gap and they document radical forms of governance at local level which have sought to create more equitable governance intelligent accountability and greater involvement of key stakeholders such as students Providing a series of provocations and reminders of the possibilities that remain open to us the World Yearbook of Education 2020 will be of interest to academics professionals and policymakers in education and school governance and any scholars who engage in historical studies of education and debates about educational governance and equality

**Governing by Numbers** Stephen Ball, 2018-10-11

Social science researchers have become increasingly attentive to the role of numbers in contemporary life Issues around big data national test results and output and performance statistics are now routinely reported and debated in the media Numbers are a powerful resource for governments as a means to manage and improve their populations and we are increasingly represented organized and driven by an economy of numbers which inserts itself into more and more aspects of our lives This book critically addresses some of the ways in which numbers are deployed in educational governance and practice and some of the consequences of this deployment for what it means to be educated to teach and to learn Recognising that numbers do not simply represent but that they change things and have real effects allows us to move beyond a system where difficult and important issues about what we want from education and from teachers are side stepped in the push to improve our numbers This collection offers a set of starting points from which we might speak back to numbers drawing on research to explore how numbers change the way we think about ourselves and what we do This book was originally published as a special issue of the Journal of Education Policy

**The Courts and Standards Based Reform** Benjamin Michael Superfine, 2008-07-29 Since the desegregation of public schools in the 1950s the concept of standards based reform has become a central topic within educational policy Every American state is now required to enact standards based reform policies while shifting responsibility away from the government and holding schools more accountable for their students performance The Courts and Standards Based Education Reform positions itself at the center of the long standing dispute between law education and public policy and analyzes the court's growing role in educational policy Benjamin Superfine contends that the courts are a strong force in determining education policy and have been placed in the position to decide

some of the most contentious and important issues facing education law as the standards based reform movement has grown. Such major cases addressed by the courts in light of standards based reforms include the No Child Left Behind Act of 2001 and school finance reform litigation. As the courts continue to rule in cases that challenge fundamental aspects of U.S. educational policy, Superfine provides a new approach that can be used in the application and rulings of standards based reforms.
