**Geographical imaginations** Derek Gregory,1994 *Weather, Climate, and the Geographical Imagination* Martin Mahony,Samuel Randalls,2020-03-24 As global temperatures rise under the forcing hand of humanity s greenhouse gas emissions new questions are being asked of how societies make sense of their weather of the cultural values which are afforded to climate and of how environmental futures are imagined feared predicted and remade *Weather Climate and Geographical Imagination* contributes to this conversation by bringing together a range of voices from history of science historical geography and environmental history each speaking to a set of questions about the role of space and place in the production circulation reception and application of knowledges about weather and climate The volume develops the concept of geographical imagination to address the intersecting forces of scientific knowledge cultural politics bodily experience and spatial imaginaries which shape the history of knowledges about climate

**Key Texts in Human Geography** Phil Hubbard,Rob Kitchin,Gill Valentine,2008-05-19 A book that will delight students *Key Texts in Human Geography* is a primer of 26 interpretive essays designed to open up the subject s landmark monographs of the past 50 years to critical interpretation The essays are uniformly excellent and the enthusiasm of the authors for the project shines through It will find itself at the top of a thousand module handouts *THE Textbook Guide* Will surely become a key text itself Read any chapter and you will want to compare it with another Before you realize an afternoon is gone and then you are tracking down the originals Professor James Sidaway University of Plymouth An essential synopsis of essential readings that every human geographer must read It is highly recommended for those just embarking on their careers as well as those who need a reminder of how and why geography moved from the margins of social thought to its very core Barney Warf Florida State University Undergraduate geography students are often directed to key texts in the literature but find them difficult to read because of their language and argument As a result they fail to get to grips with the subject matter and gravitate towards course textbooks instead *Key Texts in Human Geography* serves as a primer and companion to the key texts in human geography published over the past 40 years It is not a reader but a volume of 26 interpretive essays highlighting the significance of the text how the book should be read reactions and controversies surrounding the book the book s long term legacy It is an essential reference guide for all students of human geography and provides an invaluable interpretive tool in answering questions about human geography and what constitutes geographical knowledge

**The War Lawyers** Craig Jones,2020-11-26 Over the last 20 years the world s most advanced militaries have invited a small number of military legal professionals into the heart of their targeting operations spaces which had previously been exclusively for generals and commanders These professionals trained and hired to give legal advice on an array of military operations have become known as war lawyers *The War Lawyers* examines the laws of war as applied by military lawyers to aerial targeting operations carried out by the US military in Iraq and Afghanistan and the Israel military in Gaza Drawing on interviews with

military lawyers and others this book explains why some lawyers became integrated in the chain of command whereby military targets are identified and attacked whether by manned aircraft drones and or ground forces and with what results This book shows just how important law and military lawyers have become in the conduct of contemporary warfare and how it is understood Jones argues that circulations of law and policy between the US and Israel have bolstered targeting practices considered legally questionable contending that the involvement of war lawyers in targeting operations enables legitimises and sometimes even extends military violence

**Spaces of Danger** Heather Merrill, Lisa M. Hoffman, 2015-12-01 These twelve original essays by geographers and anthropologists offer a deep critical understanding of Allan Pred's pathbreaking and eclectic cultural Marxist approach with a focus on his concept of situated ignorance the production and reproduction of power and inequality by regimes of truth through strategically deployed misinformation diversions and silences As the essays expose the cultural and material circumstances in which situated ignorance persists they also add a previously underexplored spatial dimension to Walter Benjamin's idea of moments of danger The volume invokes the aftermath of the July 2011 attacks by far right activist Anders Breivik in Norway who ambushed a Labor Party youth gathering and bombed a government building killing and injuring many Breivik had publicly and forthrightly declared war against an array of liberal attitudes he saw threatening Western civilization However as politicians and journalists interpreted these events for mass consumption a narrative quickly emerged that painted Breivik as a lone madman and steered the discourse away from analysis of the resurgent right wing racisms and nationalisms in which he was immersed The Breivik case is merely one of the most visible recent examples say editors Heather Merrill and Lisa Hoffman of the unchallenged production of knowledge in the public sphere In essays that range widely in topic and setting for example brownfield development in China a Holocaust memorial in Germany an art gallery exhibit in South Africa this volume peels back layers of situated practices and their associated meaning and power relations Spaces of Danger offers analytical and conceptual tools of a Predian approach to interrogate the taken for granted and make visible and legible that which is silenced
