Global Power:

The Responsibilities of a Global Power United States. Office of Armed Forces Information and Education, 1964 **From**
Superpower to Besieged Global Power Edward A. Kolodziej, Roger E. Kanet, 2010-01-25 The essays in this volume argue that the Bush Doctrine as outlined in the September 2002 National Security Strategy of the United States squandered enormous military and economic resources diminished American power and undermined America's moral reputation as a defender of democratic values and human rights The Bush Doctrine misguidedly assumed that the United States was a superpower a unique unipolar power that could compel others to accede to its preferences for world order In reality the United States is a formidable but besieged global power one of a handful of nations that could influence but certainly not dictate world events The flawed doctrine has led to failed policies that extend America's reach beyond its grasp most painfully evident in the wars in Iraq and Afghanistan Leading scholars and policy analysts from nine countries assess the impact of the Bush Doctrine on world order explain how the United States reached its current low standing internationally and propose ways that the country can repair the untold damage wrought by ill conceived and incompetently executed security and foreign policies Contributors focus on the principal regions of the world where they have expertise Asia Europe Africa the Middle East Latin America and Russia The contributors agree that future security and foreign policies must be informed by the limitations of U S economic cultural and military power to shape world order to reflect American interests and values American power and influence will increase only when the United States binds itself to moral norms legal strictures and political accords in cooperation with other like minded states and peoples Propelling India from Socialist Stagnation to Global Power: Growth process Arvind Virmani, 2006 Presents a comprehensive retrospective of India's economic policies and performances including an in depth analysis of a wide range of issues from a variety of perspectives historical global institutional and political economic The discussion explores the tripolar world comprised of the United States China and India as the changing dominant players in global power **Balance of Power** T. V. Paul, James J. Wirtz, Michel Fortmann, 2004 Since the sudden disappearance of the Soviet Union many scholars have argued that the balance of power theory is losing its relevance This text examines this viewpoint as well as looking at systematic factors that may hinder or favour the return of balance of power politics **Strategic Vision** Zbigniew Brzezinski, 2012-01-24 By 1991 following the disintegration first of the Soviet bloc and then of the Soviet Union itself the United States was left standing tall as the only global super power Not only the 20th but even the 21st century seemed destined to be the American centuries But that super optimism did not last long During the last decade of the 20th century and the first decade of the 21st century the stock market bubble and the costly foreign unilateralism of the younger Bush presidency as well as the financial catastrophe of 2008 jolted America and much of the West into a sudden recognition of its systemic vulnerability to unregulated greed Moreover the East was demonstrating a surprising capacity for economic growth and technological

innovation That prompted new anxiety about the future including even about America's status as the leading world power This book is a response to a challenge It argues that without an America that is economically vital socially appealing responsibly powerful and capable of sustaining an intelligent foreign engagement the geopolitical prospects for the West could become increasingly grave The ongoing changes in the distribution of global power and mounting global strife make it all the more essential that America does not retreat into an ignorant garrison state mentality or wallow in cultural hedonism but rather becomes more strategically deliberate and historically enlightened in its global engagement with the new East This book seeks to answer four major questions 1 What are the implications of the changing distribution of global power from West to East and how is it being affected by the new reality of a politically awakened humanity 2 Why is America's global appeal waning how ominous are the symptoms of America's domestic and international decline and how did America waste the unique global opportunity offered by the peaceful end of the Cold War 3 What would be the likely geopolitical consequences if America did decline by 2025 and could China then assume America's central role in world affairs 4 What ought to be a resurgent America's major long term geopolitical goals in order to shape a more vital and larger West and to engage cooperatively the emerging and dynamic new East America Brzezinski argues must define and pursue a comprehensive and long term a geopolitical vision a vision that is responsive to the challenges of the changing historical context This book seeks to provide the strategic blueprint for that vision
