Political and Economic Foundations in Global

Studies Michael Anderson, Stephanie Holmsten, 2020-01-29 Political and Economic Foundations in Global Studies provides an innovative introductory examination of the global forces shaping the world today seen through political and economic lenses. Along with its companion Social and Cultural Foundations in Global Studies the book exposes students to the historical contours of and the key concepts and processes that underlie the interconnections among individuals, societies, organizations, and governments. As in the rest of Routledge's Global Studies series the Foundations books employ a two-part strategy: conceptual underpinnings explored in the first part are enlivened by case studies in the second. Special features magnify the utility of the text: Text boxes are employed to expand and emphasize specific material; they are used to open up the coverage to related topics or to call attention to especially critical material such as historical milestones or key vocabulary. Resource boxes offer links that point readers to sources, mostly online, on the topics discussed and establish a rich archive of additional material for readers to draw on. At the same time, back of chapter References and Further Research lists help students to trace the material used by authors or to follow more general leads relating to the topics covered in the chapters. Images highlight specific details of the case studies, helping to bring the subjects alive. [Global Studies Encyclopedic Dictionary](#)

Alexander N. Chumakov, Ivan I. Mazour, William C. Gay, 2014-07-01 This book provides brief expositions of the central concepts in the field of Global Studies. Former President of the Soviet Union Mikhail Gorbachev says: "The book is intelligent, rich in content, and I believe necessary in our complex, turbulent, and fragile world." 300 authors from 50 countries contributed 450 entries. The contributors include scholars, researchers, and professionals in social, natural, and technological sciences. They cover globalization problems within ecology, business, economics, politics, culture, and law. This interdisciplinary collection provides a basis for understanding the concepts and methods within global studies and for accessing lengthier and more technical research in the field. The articles treat such important topics as the biosphere, ozone depletion, land resources, and pollution, world health challenges, education, global modeling, sustainable development, war, weapons of mass destruction, and terrorism. The book also promotes academic cooperation, political dialogue, and mutual understanding across diverse traditions and national identities that are needed to engage successfully the many daunting challenges of globalization.

Connectivity and Global Studies Jan Nederveen Pieterse, 2021-02-19 This textbook provides readers with evocative and analytical accounts of social processes that are linked to globalization and connectivity, which includes a wide range of multi-centred connections in history, DNA analysis, technology, art, populism, and political economy. Rather than globalization, Nederveen Pieterse focuses on connectivity. His approach to globalization differs from both structuralist accounts of the world system and the institutionally centred focus of much work in international studies. This synthesis will provide a new resource to reconstruct theoretical approaches to globalization and global studies. Fluently written, clearly organized, and with an interdisciplinary approach, the book will be accessible to upper division undergraduates and graduates in social sciences, including students and researchers from the fields of sociology, politics, political economy, development studies, and

international relations **Introduction to Global History, Culture, and Ideology** Philip McCarty, 2018-03-13 Integrated Perspectives in Global Studies provides readers with an analytical framework that moves beyond academic debates about the definition of globalization. The material is organized around substantive themes that are both accessible to students and relevant to what is going on in the world today. This student-friendly introduction begins by highlighting the deep historical interconnections between political, economic, and social forces that shape our world today. The readings then focus on pressing real-world issues such as global inequality, neo-imperialism, racism, environmental degradation, and global women's movements. The final section of the book explores critical perspectives on sustainable development, human rights, and global governance. Throughout the text, abstract ideas are grounded in concrete, highly relatable examples. Main points and key concepts are clearly listed to enhance review and comprehension. Now featuring essay questions at the end of each section, Integrated Perspective in Global Studies can be used in courses on political science, international relations, and globalization. The book continually and explicitly connects the dots, making it possible for students to easily understand and connect complex issues.

It examines the processes and dynamics of globalization that impact our modern world through clear explanations of complex theories. The book presents 8 key models of global change, bringing together the ways in which sociology, politics, and economics think about global studies. Covers a diverse range of major theorists in the field, from Giddens to Huntington, from Wallerstein to Fukuyama. Brings to life contemporary issues, including the global financial crisis and the war on terror. The Routledge Handbook of Transformative Global Studies S. A. Hamed Hosseini, James Goodman, Sara C. Motta, Barry K. Gills, 2020-06-09 The Routledge Handbook of Transformative Global Studies provides diverse and cutting-edge perspectives on this fast-changing field. For 30 years, the world has been caught in a long global interregnum, plunging from one crisis to the next and witnessing the emergence of new, vibrant, multiple, and sometimes contradictory forms of popular resistance and politics. This global interregnum, or a period of uncertainty where the old hegemony is fading and the new ones have not yet been fully realized, necessitates critical self-reflection, brave intellectual speculation, and unlearning of perceived wisdoms and greater transdisciplinary collaboration across theories, localities, and subjects. This Handbook takes up this challenge by developing fresh perspectives on globalization, development, neoliberalism, capitalism, and their progressive alternatives, addressing issues of democracy, power, inequality, insecurity, precarity, wellbeing, education, displacement, social movements, violence, and war, and climate change. Throughout, it emphasizes the dynamics for system change, including bringing post-capitalist, feminist, decolonial, and other critical perspectives to support transformative global praxis. This volume brings together a mixture of fresh and established scholars from across disciplines and from a range of both Northern and Southern contexts. Researchers and students from

around the world and across the fields of politics sociology international development international relations geography economics area studies and philosophy will find this an invaluable and fresh guide to global studies in the 21st century
