Multiple Criteria Optimization Xavier Gandibleux, 2006-04-11 The generalized area of multiple criteria decision making MCDM can be defined as the body of methods and procedures by which the concern for multiple conflicting criteria can be formally incorporated into the analytical process MCDM consists mostly of two branches multiple criteria optimization and multi criteria decision analysis MCDA While MCDA is typically concerned with multiple criteria problems that have a small number of alternatives often in an environment of uncertainty location of an airport type of drug rehabilitation program multiple criteria optimization is typically directed at problems formulated within a mathematical programming framework but with a stack of objectives instead of just one river basin management engineering component design product distribution It is about the most modern treatment of multiple criteria optimization that this book is concerned I look at this book as a nicely organized and well rounded presentation of what I view as new wave topics in multiple criteria optimization Looking back to the origins of MCDM most people agree that it was not until about the early 1970s that multiple criteria optimization coalesced as a field At this time and for about the following fifteen years the focus was on theories of multiple objective linear programming that subsume conventional single criterion linear programming algorithms for characterizing the efficient set theoretical vector maximum developments and interactive procedures

Multi-Objective Programming and Goal Programming Mehrdad Tamiz, 1996-02-19 Most real life problems involve making decisions to optimally achieve a number of criteria while satisfying some hard or soft constraints In this book several methods for solving such problems are presented by the leading experts in the area The book also contains a number of very interesting application papers which demonstrate theoretical modelling analysing and solution of real life problems

Multiple Criteria Decision Making and its Applications to Economic Problems Enrique Ballesteros, Carlos Romero, 2013-03-14 Multiple Criteria Decision Making and its Applications to Economic Problems ties Multiple Criteria Decision Making MCDM Multiple Objective Optimization MO and economics together It describes how MCDM methods goal programming can be used in economics The volume consists of two parts Part One of the book introduces the MCDM approaches This first part comprising Chapters 1 5 is basically an overview of MCDM methods that can most likely be used to address a wide range of economic problems Readers looking for an in depth discussion of multi criteria analysis can grasp and become acquainted with the initial MCDM tools language and definitions Part Two which comprises Chapters 6 8 focuses on the theoretical core of the book Thus in Chapter 6 an economic meaning is given to several key concepts on MCDM such as ideal point distance function etc It illustrates how Compromise Programming CP can support the standard premise of utility optimisation in economics as well as how it is capable of approximating the standard utility optimum when the decision makers preferences are incompletely specified

Chapter 7 deals entirely with production analysis The main characteristic throughout the Chapter refers to a standard joint production scenario analysed from the point of view of MCDM schemes Chapter 8 focuses on the utility specification problem in the n arguments space within a risk aversion context A link between Arrows risk aversion coefficient and CP utility permits this task The book is intended for postgraduate students and researchers in economics with an OR MS orientation or in OR MS with an economic orientation In short it attempts to fruitfully link economics and MCDM

Practical Goal Programming Dylan Jones,Mehrdad Tamiz,2010-03-10 Practical Goal Programming is intended to allow academics and practitioners to be able to build effective goal programming models to detail the current state of the art and to lay the foundation for its future development and continued application to new and varied fields Suitable as both a text and reference its nine chapters first provide a brief history fundamental definitions and underlying philosophies and then detail the goal programming variants and define them algebraically Chapter 3 details the step by step formulation of the basic goal programming model and Chapter 4 explores more advanced modeling issues and highlights some recently proposed extensions Chapter 5 then details the solution methodologies of goal programming concentrating on computerized solution by the Excel Solver and LINGO packages for each of the three main variants and includes a discussion of the viability of the use of specialized goal programming packages Chapter 6 discusses the linkages between Pareto Efficiency and goal

programming Chapters 3 to 6 are supported by a set of ten exercises and an Excel spreadsheet giving the basic solution of each example is available at an accompanying website Chapter 7 details the current state of the art in terms of the integration of goal programming with other techniques and the text concludes with two case studies which were chosen to demonstrate the application of goal programming in practice and to illustrate the principles developed in Chapters 1 to 7 Chapter 8 details an application in healthcare and Chapter 9 describes applications in portfolio selection

Fuzzy Multiple Objective Decision Making Gwo-Hshiung Tzeng, Jih-Jeng Huang, 2016-04-19 Multi objective programming MOP can simultaneously optimize multi objectives in mathematical programming models but the optimization of multi objectives triggers the issue of Pareto solutions and complicates the derived answers To address these problems researchers often incorporate the concepts of fuzzy sets and evolutionary algorithms into MOP models Focusing on the methodologies and applications of this field Fuzzy Multiple Objective Decision Making presents mathematical tools for complex decision making The first part of the book introduces the most popular methods used to calculate the solution of MOP in the field of multiple objective decision making MODM The authors describe multi objective evolutionary algorithms expand de novo programming to changeable spaces such as decision and objective spaces and cover network data envelopment analysis The second part focuses on various applications giving readers a practical in depth understanding of MODM A follow up to the authors Multiple Attribute Decision Making Methods and Applications this book guides practitioners in using MODM methods to make effective decisions It also extends students knowledge of the methods and provides researchers with the foundation to publish papers in operations research and management science journals
