Review, 1995 All Connected Bruce Langtry, 1998. Change is the only constant in Australian telecommunications today. Although there is bipartisan political support for universal service as a goal, questions remain: What kind of service should be universal and at what price? Will the advent of an open market bring new telecommunications services to all of us or will some Australians be left behind? Have governments placed too much faith in the market and neglected the ethical dimensions of access to telecommunications? *All Connected* takes a timely look at the ethical questions involved in current public policy debates around these issues. Practitioners from a number of different fields examine the changing uses and governance of our telecommunications system and the implications of these changes.
