was the end result of massive privatization of agricultural sector in Bangladesh that in fact helped the rich farmers to adopt HYV and modern agricultural practices agrochemicals pesticides fertilizers and privatization also helped them availing of low cost tube wells and agricultural inputs increase of irrigation facilities But the poor farmers were hardly affected by the privatization strategy But the negative scenario in case of poverty is that globalization has increased income inequality in Bangladesh Lastly from both content analysis and case studies it was found that globalization has created employment opportunities of women in the garments industries RMG in the export processing zones of Bangladesh Mostly these women are the poverty stricken women who migrated to city areas from rural areas for employment but the foreign investors are exploited these women by providing a low salary and employed them excessive hours for ensuring their optimum production
