

GROWTH THROUGH REASON

ALBERT ELLIS Ph.D.

VERBATIM CASES IN RATIONAL-EMOTIVE THERAPY

Listening in on the actual dialogue between a patient and his psychotherapist is a fascinating experience — and an instructive one, both for other therapists and for the layman interested in personal growth. In this book the well-known psychologist Albert Ellis "plays back" actual therapy sessions conducted by six different therapists, including himself. The patients present such widely varying problems as a couple who have never had intercourse in thirteen years of marriage, a young man who is afraid he is becoming a homosexual, and a young woman who feels guilty about not following her parents' rules.

At frequent intervals Dr. Ellis stops the tape, so to speak, to explain what is happening — what techniques of rational-emotive therapy (RET) the therapist is using and what growth is taking place in the patient as a result.

As originator of the rational-emotive approach, Dr. Ellis speaks with authority and experience. He points frankly to those instances where the therapist has departed from "classical" RET methods or where he himself might handle a situation differently today than when the case was recorded. The introduction offers an excellent short explanation of what RET is all about and how it differs from other approaches such as psychoanalysis (which Dr. Ellis practiced earlier in his career).

Throughout the book the writing is frank and forceful, with a minimum of psychological jargon — a highly readable style already familiar to readers of Dr. Ellis's many other books.
