

Basic cast and retrieve fishing involves tossing out a lure—a swimbait, a crankbait, a spinner—and reeling it back using a particular motion. There are several cast and retrieve techniques used for targeting different fish species in various conditions.

1. Hold your rod at waist level and parallel to the ground.

2. Bring the rod back over your shoulder to the 2 o'clock position.

3. Bring the rod forward in a smooth movement.

4. Release your line when the rod reaches the 10 o'clock position.

5. Allow the lure to fly through the air and land in the water.
