Ground Of The Image:

The Ground of the Image Jean-Luc Nancy, 2009-08-25 If anything marks the image it is a deep ambivalence Denounced as superficial illusory and groundless images are at the same time attributed with exorbitant power and assigned a privileged relation to truth Mistrusted by philosophy forbidden and embraced by religions manipulated as spectacle and proliferated in the media images never cease to present their multiple aspects their paradoxes their flat but receding spaces What is this power that lies in the depths and recesses of an image which is always only an impenetrable surface What secrets are concealed in the ground or in the figures of an image which never does anything but show just exactly what it is and nothing else How does the immanence of images open onto their unimaginable others their imageless origin In this collection of writings on images and visual art Jean Luc Nancy explores such questions through an extraordinary range of references From Renaissance painting and landscape to photography and video from the image of Roman death masks to the language of silent film from Cleopatra to Kant and Heidegger Nancy pursues a reflection on visuality that goes far beyond the many disciplines with which it intersects He offers insights into the religious cultural political art historical and philosophical aspects of the visual relation treating such vexed problems as the connection between image and violence the sacred status of images and in a profound and important essay the forbidden representation of the Shoah In the background of all these investigations lies a preoccupation with finitude the unsettling forces envisaged by the images that confront us the limits that bind us to them the death that stares back at us from their frozen traits and distant intimacies In these vibrant and complex essays a central figure in European philosophy continues to work through some of the most important questions of our time
