**France** Jean-Louis Cohen,2014-08-15 Everyone knows Notre Dame the Eiffel Tower and the chateaux of the Loire Valley but French architects have also produced some of the most iconic buildings of the twentieth century playing a central role in the emergence and development of modernism In France Jean Louis Cohen presents a complete narrative of the unfolding architectural modernity in the country grappling not only with the buildings but also with the political and critical context surrounding them Cohen examines the developments in urban design and architecture within France depicting the continuities and breaks in French architecture since 1900 against a broader international background Describing the systems of architectural exchange with other countries including Italy Germany Russia and the United States he offers a new view on the ideas projects and buildings otherwise so often considered only from narrow nationalistic perspectives Cohen also maps the problematic search for a national identity against the background of European rivalries and France s colonial past Drawing on a wealth of recent research this authoritatively written book will challenge the way design professionals and historians view modern French architecture    L'architecture moderne en France Claude Loupiac,Gérard Monnier,2000

Rudolph,2015-03-01 After World War II France embarked on a project of modernization which included the development of the modern mass home At Home in Postwar France examines key groups of actors state officials architects sociologists and tastemakers arguing that modernizers looked to the home as a site for social engineering and nation building designers and advocates of the modern home contributed to the democratization of French society and the French home of the Trente Glorieuses as it was built and inhabited was a hybrid product of architects planners and residents understandings of modernity This volume identifies the right to comfort as an invention of the postwar period and suggests that the modern mass home played a vital role in shaping new expectations for well being and happiness    **The Social Project** Kenny Cupers,2014-04-01 Winner of the 2015 Abbott Lowell Cummings prize from the Vernacular Architecture Forum Winner of the 2015 Sprio Kostof Book Award from the Society of Architectural Historians Winner of the 2016 International Planning History Society Book Prize for European Planning History Honorable Mention 2016 Wylie Prize in French Studies In the

three decades following World War II the French government engaged in one of the twentieth century's greatest social and architectural experiments transforming a mostly rural country into a modernized urban nation Through the state sanctioned construction of mass housing and development of towns on the outskirts of existing cities a new world materialized where sixty years ago little more than cabbage and cottages existed Known as the banlieue the suburban landscapes that make up much of contemporary France are near opposites of the historic cities they surround Although these postwar environments of towers slabs and megastructures are often seen as a single utopian blueprint gone awry Kenny Cupers demonstrates that their construction was instead driven by the intense aspirations and anxieties of a broad range of people Narrating the complex interactions between architects planners policy makers inhabitants and social scientists he shows how postwar dwelling was caught between the purview of the welfare state and the rise of mass consumerism The Social Project unearths three decades of architectural and social experiments centered on the dwelling environment as it became an object of modernization an everyday site of citizen participation and a domain of social scientific expertise Beyond state intervention it was this new regime of knowledge production that made postwar modernism mainstream The first comprehensive history of these wide ranging urban projects this book reveals how housing in postwar France shaped both contemporary urbanity and modern architecture
