fractions How to solve quadratic equations etc The target audience is undergraduate freshmen enrolled in remedial mathematics courses At my Bronx Community College CUNY which is a typical school every year about 85% of incoming students must take at least one remedial mathematics class And every year the Department struggles to find good books for our three remedial courses This book covers any possible remedial mathematics class It may also be useful for high school students preparing for college Moreover based on my experience the book can also be useful to many elementary school teachers Based on my significant experience with our foreign students I m sure that this book which shows what the future students of American colleges and universities must know has a huge market in Asia and Africa Bulletin Texas Education Agency,1977 Books and Pamphlets, Including Serials and Contributions to Periodicals Library of Congress.
