Philosophy in Children's Literature Peter Costello, 2011-12-29 This book allows philosophers literary theorists and education specialists to come together to offer a series of readings on works of children's literature Each of their readings is focused on pairing a particular popular picture book or a chapter book with philosophical texts or themes The book has three sections the first on picturebooks the second on chapter books and the third on two sets of paired readings of two very popular picturebooks By means of its three sections the book sets forth as its goal to show how philosophy can be helpful in reappraising books aimed at children from early childhood on Particularly in the third section the book emphasizes how philosophy can help to multiply the type of interpretative stances that are possible when readers listen again to what they thought they knew so well The kinds of questions this book raises are the following How are children's books already anticipating or articulating philosophical problems and discussions How does children's literature

work by means of philosophical puzzles or language games What do children s books reveal about the existential situation the child reader faces In posing and answering these kinds of questions the readings within the book thus intersect with recent developing scholarship in children s literature studies as well as in the psychology and philosophy of childhood
